Prophets at a Tangent Geoff Mulgan, 2023-03-02 This Element asks if the arts can help us imagine a better future society and economy without deep social gulfs or ecological harm It argues that at their best the arts open up new ways of seeing and thinking They can warn and prompt and connect us to a bigger sense of what we could be But artists have lost their role as gods and prophets partly as an effect of digital technologies and the ubiquity of artistic production and partly as an effect of shifting values Few recent books films artworks or exhibitions have helped us imagine how our world could solve its problems or how it might be better a generation or more from now This Element argues that artists work best not as prophets of a new society but rather as prophets at a tangent Core Principles of Special and General Relativity James Luscombe, 2018-12-07 This book provides an accessible yet thorough introduction to special and general relativity crafted and class tested over many years of teaching Suitable for advanced undergraduate and graduate students this book provides clear descriptions of how to approach the mathematics and physics involved It is also contains the latest exciting developments in the field including dark energy gravitational waves and frame dragging The table of contents has been carefully developed in consultation with a large number of instructors teaching courses worldwide to ensure its wide applicability to modules on relativity and gravitation Features A clear accessible writing style presenting a sophisticated approach to the subject that remains suitable for advanced undergraduate students and above Class tested over many years To be accompanied by a partner volume on Advanced Topics for students to further extend their learning Bicycling Through Time Paul & Charlie Farren, 2013-07-19 0 0 1 111 636 The Images Publishing Group 5 1 746 14 0 Normal 0 false false false EN US JA X NONE Style Definitions table MsoNormalTable mso style name Table Normal mso tstyle rowband size 0 mso tstyle colband size 0 mso style noshow yes mso style priority 99 mso style parent mso padding alt 0in 5 4pt 0in 5 4pt mso para margin 0in mso para margin bottom 0001pt mso pagination widow orphan font size 10 0pt font family Cambria mso ansi language EN US Paul Farren claims he and his wife Charlie have around 85 percent of the pre 1900 bicycles in Australia all under one roof in a Melbourne warehouse cum museum Thirty years of hunting them down and collecting has resulted in one of the most impressive early bike collections in the world It includes 160 pre 1900 bicycles including hobby horses boneshakers and Penny Farthings as well as early 20th century models The collection charts the development of the bicycle which foreshadows the invention of the motor car in many surprising ways It also shows wider social change and the role the bicycle has played in female emancipation war and its progression from plaything of the wealthy to utilitarian mode of transport of the masses **Multiple-Time-Scale Dynamical Systems** Christopher K.R.T. highlighted in this work that includes a theory of relaxation oscillation phenomena in higher dimensional phase spaces Subtle exponentially small effects result from singular perturbations implicit in certain multiple time scale systems Their role in the slow motion of fronts bifurcations and jumping between invariant tori are all explored here Neurobiology has played a particularly stimulating role in the development of these techniques and one paper is directed specifically at applying geometric singular perturbation theory to reveal the synchrony in networks of neural oscillators **Smithells Metals**
