Taping Techniques Principles And Practice:

An Illustrated Guide To Taping Techniques Thomas John Hewetson, Karin Austin, Kathryn Gwynn-Brett, Sarah Marshall, 2009-12-11 This successful and acclaimed guide has now been fully updated and expanded in its second edition. Injuries are a constant problem in sporting life and often require immediate on the spot action to alleviate pain and limit further damage. This book addresses the two most essential elements of effective taping: recognition of injuries and application of techniques. Accessible, portable and easy to use, the book is organized into two sections: the first covers taping supplies and their use, taping objectives, guidelines, basic pathology and key taping strategies; the second shows taping techniques in precise step by step stages illustrated by color photographs. Techniques are further illustrated by physical demonstration in the DVD accompanying the book. Good taping is a matter of practice but this book goes further than simply showing HOW to tape; it explores the reasons WHY we tape and the therapeutic effect it has on the physiology, neurophysiology, biomechanics, neuromusculoskeletal system and psychology of an individual. The possible adverse reactions to these systems are also covered as well as dermatological adverse reactions. Easy to use step by step pictorial presentation demonstrates techniques to provide immediate pain relief as well as the best environment for healing. Includes detailed charts to help identify the injury and select the most appropriate taping technique. Illustrates and clarifies basic soft tissue anatomy and physiology. Portable on field manual. Describes selection and use of taping material. New color photographs and anatomical illustrations. DVD with videoclips of taping techniques.

Taping Techniques Rose Macdonald, 1994 Functional taping is now acknowledged internationally as having a place in sports medicine. Taping techniques are practiced widely in the treatment and rehabilitation of the injured patient in order to aid the healing process by supporting and protecting the injured structures. Taping thus allows earlier resumption of activity and gives the patient confidence that the tissues are protected against re-injury.
