

Target Japan

Dekun Hu

Target Japan:

Climate Change Policy in Japan Yasuko Kameyama, 2016-11-25 Amidst growing environmental concerns worldwide Japan is seen as particularly vulnerable to the effects of changing climate This book considers Japan's response to the climate change problem from the late 1980s up to the present day assessing how the Japanese government's policy making process has developed over time From the early days of climate change policy in Japan through the United Nations Framework Convention on Climate Change conferences and Kyoto Protocol right up to the 2015 negotiations the book examines the environmental economic and political factors that have shaped policy As the 2015 Conference of the Parties to the United Nations Framework Convention on Climate Change projects forward beyond 2020 the book concludes by analyzing how Japan has placed itself in the global climate change debate and how the country might and should respond to the problem in the future based on the findings from accumulated history

Fans of Japan Charlotte Maria Birch Salwey, 1894 *Enabling Asia to Stabilise the Climate* Shuzo Nishioka, 2015-11-26 This book presents good practices in Asia and ASEAN countries for effectively promoting advances in response to climate change which can help to achieve sustainable development in Asia and around the world As a proposal the aim is to influence the discussions at COP 21 by providing a positive agenda with concrete actions from an Asian perspective The book is divided into three parts Part 1 describes the greenhouse gas GHG reduction scenario from an Asian perspective and in line with global 2 targets Based on modeling analysis the studies demonstrate the theoretical potentials and send the policymakers at COP 21 the positive message that Asia can reach the target As Asian countries vary in terms of their economic strength country specific scenario studies for the two giants China and India as well as for Japan and Vietnam are introduced to show the different approaches for each country Part 2 shows successful examples of how modeling analysis are reflected in actual policy development which provides practical guidelines to help policymakers develop their own roadmaps with stakeholder dialogue not only in Asia but also in other regions of the world The Nationally Appropriate Mitigation Action NAMA roadmap development in Thailand as well as the Iskandar Malaysia project show at the country and city level how researchers and policymakers are working closely to succeed Part 3 focuses on a number of sector specific activities including transportation forestry capacity development and inventory work in Asia Rather than discussing the Low Carbon Society LCS concept in detail the respective chapters highlight unique concrete and practically applicable examples from Asia showing how Asian countries are addressing climate change mitigation issues in a collaborative manner an approach that can be replicated in other regions While the ultimate goal of this book is to facilitate international climate regime making local government and international organizations United Nations World Bank and others officers researchers international NGO NPOs consultants students particularly those studying international relationships or environmental studies as well as reporters will find this book useful in broadening their understanding of low carbon development in Asia

Handbook of Japan's Environmental Law, Policy and Politics Hiroshi

Ohta,2025-10-01 This handbook offers an exposition of the contemporary status of Japan's environmental law policy and politics. The compass of ecological quandaries explored within this tome is expansive encompassing issues pertinent to both natural and synthetic ecosystems, natural resources and inorganic materials. Each chapter's temporal framework corresponds to the postwar period following the enactment of environmental statutes and the initiation of administrative institutionalization situated approximately in the early 1970s. The central inquiry addressed in this compendium pertains to the extent to which prevailing environmental statutes and policies have contributed to the enhancement or conservation of Japan's natural and synthetic ecosystems as well as the resilience of its natural resources. The authors within this volume undertake an analysis to discern the causal factors behind the quandaries by ascribing them to the existence or absence of enforceable regulations, public involvement in policy formulation processes, bureaucratic fragmentation, pioneering regulatory measures, institutional obstacles, regulatory co-optation, rational cost-effective methodologies, scientific understanding, scientific communities, ecological commerce, environmental non-governmental organizations, NGOs and holistic ecological plans and programs. Moreover, pertinent sections raise an inquiry concerning Japan's ecological diplomacy, inquiring whether Japan serves as a leader, bystander or obstructionist. *The Japan Daily Mail*, 1884

The Chinese War of Resistance against Japanese Aggression 1931-1945: A World History Perspective Part I Dekun Hu,2022-09-05 This monograph demonstrates the prominent historical position of China's War of Resistance Against Japanese Aggression in WW II and argues that China's War of Resistance made great contributions to the Global Anti Fascist Warfare. In specific, the book elaborates on the following six aspects: Firstly, China's War of Resistance Against Japan represents the progressive trend in the world history. Secondly, China's protracted war of resistance smashed Japan's quick battle strategy against China. Thirdly, China's War of Resistance contained Japan's world strategies of northward advance, southward advance, westward advance and its diplomatic strategies in general. Fourthly, China's War of Resistance pushed forward the U.S./Britain's strategic shift in East Asia from passivism to pro-activism. Fifthly, China's War of Resistance provided strong support to the successful operation of U.S./Britain's global strategy. Finally, Chinese wartime diplomacy enhanced the establishment and consolidation of the Global Anti Fascist Alliance. This book is a timely research output written by distinguished Chinese scholars concerning the historical position of China's War of Resistance Against Japanese Aggression in WWII. In general, China's sacrifices and contributions in WWII are little known to the Western world. Although China is widely acknowledged as one of the four most important nations in the Global Anti Fascist Alliance during WWII, historians in U.S./Britain and the former Soviet Union tend to minimize or neglect the prominent historical position that China held in WWII. The limited acknowledgement and the total negligence of China's important role in WWII were mainly attributable to the Cold War in the Post WWII era and the ensuing Sino-Soviet Union split. To restore the historical truth and to fill in the research gap, Chinese scholars are obligated to fully investigate China and the world in the Global Anti Fascist Warfare and brought into focus China's historical

Climate Change Mitigation Mitsutsune Yamaguchi, 2012-06-26 Climate change is mainly caused by emissions of CO₂ from burning fossil fuels which provides over 85% of the world's energy. Strategies for mitigating climate change are connected with handling economic and social activities through their effects on the use of energy. Climate Change Mitigation investigates the costs of mitigation measures in comparison to their benefits and compares the effects of implementing mitigation measures on various areas such as energy security and energy economy. For 20 years diplomats have struggled to make progress on climate change mostly because global diplomacy is not well linked to the realities of how nations and firms control emissions and adapt to the impacts of a changing climate. In this excellent book Dr Yamaguchi has assembled experts to guide the redesign of global policy. The authors underscore how global warming efforts must resonate with other policy goals. David G Victor, Director, Laboratory on International Law and Regulation and Professor, University of California San Diego. Climate Change Mitigation clarifies that climate change cannot be controlled by sacrificing economic growth or other global problems; however, action to control climate change cannot be delayed. Climate policy is pervasive and affects all dimensions of international policy, but it cannot be too ambitious. A balanced approach between mitigation and adaptation, economic growth and resource management, and short-term development and long-term investments should be adopted. I recommend its reading. Carlo Carraro, President, Ca' Foscari University of Venice. The International Energy Agency estimates that for every 1 of investment now toward sustainable energy, 4 of future spending can be saved. There is a business case for companies to reduce energy use. Companies in the energy and resource-intensive industries must lead the way. Chad Holliday, Chairman, World Business Council for Sustainable Development and former Chair and CEO, DuPont. Routledge Handbook of Japanese Foreign Policy Mary McCarthy, 2018-02-19 From a nuclear North Korea and territorial disputes in the East China Sea to global climate change and Asia-Pacific free trade agreements, Japan is at the center of some of the most challenging issues that the world faces today. Taking an interdisciplinary approach comprising contributions from the fields of politics, sociology, history, and gender studies, this handbook creates a comprehensive and innovative overview of the field, investigating the widening variety of interests, sometimes competing, that constitute Japanese foreign policy. Organized topically, it is divided into sections including Japan's evolving foreign policy landscape, Global environmental and sustainable development, International and national security, International political economy, International norms and civil society. Providing an evaluation of the key actors, institutions, and networks influencing Japanese foreign policy, the Routledge Handbook of Japanese Foreign Policy is an essential resource for students and scholars of Japanese and Asian Politics, International Relations, and Foreign Policy. Japan's Threat Perception during the Cold War Eitan Oren, 2023-02-10 Oren re-examines Japan's threat perception during the first two decades of the Cold War using a wide range of source materials, including many unavailable in English or only recently declassified. There is a widely shared misconception that during the Cold War the Japanese were largely shielded from threats due to the American military protection; the regional balance of

power Japan's geographical insularity and domestic aversion to militarism Oren dispels this showing how security threats pervaded Japanese strategic thinking in this period By dispelling this misconception Oren enables us to more accurately gauge the degree to which Japan's threat perception has evolved during and after the end of the Cold War and to enhance our understanding of Tokyo's strategic calculus in the current situation of rivalry between China and the United States This book will be of great value to both scholars of Japanese history and contemporary international relations
