Word Order Change Ana Maria Martins, Adriana Cardoso, 2018-06-07 This volume explores word order change within the framework of diachronic generative syntax Word order is at the core of natural language grammatical systems linking syntax with prosody and with semantics and pragmatics The chapters in this volume use the tools provided by the generative theory of grammar to examine the constrained ways in which historical word order variants have given way to new ones over time Following an introduction by the editors the book is divided into four parts that investigate changes regarding the targets for movement within the clausal functional hierarchy changes or stability in the nature of the triggers for movement verb movement into the left peripheries and types of movement with specific focus on word order change in Latin Data are drawn from a wide variety of languages from different families and from both classical and modern periods including Sanskrit Tocharian Italian Portuguese Dutch Irish Hungarian and Coptic Egyptian The book's broad coverage and combination of language internal and comparative studies offers new perspectives on the relation between word order change and syntactic movement The volume also provides a range of wider insights into the properties of natural language and the way in which those properties constrain language variation and change

Historical Romance Linguistics Randall Gess, Deborah Arteaga, 2006-05-03
This volume contains 17 studies on historical Romance linguistics within a variety of current theoretical frameworks it includes studies on phonology morphology and syntax focusing solely or comparatively on all five major Romance languages French Italian Portuguese Romanian and Spanish An introduction by the eminent Romance Linguist Jürgen Klausenburger addresses the fit of these studies in the overall development of the field of historical Romance linguistics since the 19th century The studies in this volume demonstrate an organic link between Malkiel's 1961 classic definition of Romance linguistics and the field of Romance linguistics today because just as scholars of the field in the 19th century successfully applied the dominant paradigm of historical linguistics of their time Neogrammarian theory so do the authors contained in

the present volume avail themselves of current linguistic advances to achieve equally significant results **Glossa**, 1981

Historical English Syntax Dieter Kastovsky, 1991 The future of English linguistics as envisaged by the editors of *Topics in English Linguistics* lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other The *TiEL* series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics *American Book Publishing Record Cumulative, 1950-1977: Title index*

Syntactic Transfer, Contact-induced Change, and the Evolution of Bilingual Mixed Codes Anneli Sarhimaa, 1999 Comparative contact phenomena have excited growing interest among linguistic scholars in recent decades Yet there have been very few detailed case studies particularly in the area of syntactic interference The present study approaches contact induced syntactic change from the viewpoint of a single Russian modeled syntactic construction which is used to express necessity in Karelian The processes by which Russian features are entering Karelian through this construction are embedded in a broader context of codeswitching and other kinds of language mixing phenomena in bilingual speech communities in general The study employs current theories and models of bilingual language alternation particularly those produced by investigations concerned with syntax and grammar of codeswitched speech The Karelian Russian data are also discussed in relation of two recent models that have sought to explain the evolution of stable mixed languages in terms of gradual fossilisation of codeswitching patterns namely the Matrix Language Turnover model introduced by Carol Myers Scotton and the Pragmatic codeswitching continuum introduced by Peter Auer
