The New Forest A Personal View:

The New Forest C.A. Brebbia,2014-01-16 This book offers a personal view of the New Forest which stems from the author's many years of residence and research activities within the Forest. This has provided him with a deep appreciation of its unique rural charm and rich history. In writing this book the author wishes to share with readers his own enjoyment of this special part of England. Its difference from many other national parks is that it is home to many people and this has given the Forest a more dynamic environment. The New Forest has continued to develop and change over its ten centuries without losing its unique rural outlook. It has been a royal hunting ground, a source of timber to the nation, provided open space for grazing cattle, a source of minerals and charcoal, and more recently a place dedicated to relaxation and leisure. In spite of these changes its character has remained remarkably unspoilt and many of its customs have survived to the present day. This New Edition, the first edition was published in 1998 and the second edition in 2008, includes additional historical material, updates and many new photos.

'Magic is No Magic' Jozef T. Devreese, Guido Vanden Berghe, 2008-11-12 This book gives a comprehensive picture of the activities and the creative heritage of Simon Stevin who made outstanding contributions to various fields of science in particular physics and mathematics. Among the striking spectrum of his ingenious achievements it is worth emphasizing that Simon Stevin is rightly considered as the father of the system of decimal fractions as it is in use today. Stevin also urged the universal use of decimal fractions along with standardization in coinage, measures and weights. This was a most visionary proposal. Stevin was the first since Archimedes to make a significant new contribution to statics and hydrostatics. He truly was homo universalis. The impact of Stevin's work has been multilateral and worldwide including literature, William Shakespeare, science from Christian Huygens to Richard Feynman, politics, Thomas Jefferson and many other fields. Thomas Jefferson together with Alexander Hamilton and Robert Morris advocated introducing the decimal monetary units in the USA with reference to the book *De Thiende* by S. Stevin and in particular to the English translation of the book *Disme: The Art of Tents* by Robert Norton. In accordance with the title of this translation the name of the first silver coin issued in the USA in 1792 was *disme* since 1837 the spelling changed to *dime*. It was considered as a symbol of national independence of the USA.
