The Neural Atrocity:

The Neural Atrocity Mick Farren, 1977 Science fiction roman **Rethinking Serial Murder, Spree Killing, and Atrocities** Robert Shanafelt, Nathan W. Pino, 2014-11-20 Multiple killings by serial or spree killers and the mass violence seen in war crimes and other atrocities have typically been understood as discrete category types which can foster the view that there are fundamentally different kinds of human beings including deviants who are born evil and innately given to sadism or a callous lack of empathy In contrast this book considers the violence of these deviants in terms of larger questions about human violence Therefore in addition to describing the life histories of a sample of individual serial and spree murderers the book includes analysis of macro level phenomena such as genocide mass rape and killing and torture occurring under conditions of war state authorization or political upheaval The chief claim of the book is that given the right combination of factors occurring at different levels of analysis virtually anyone can emerge as a killer or perpetrator of atrocities While it is crucial to understand individual killers in terms of the details of their biographies it is equally crucial to understand political atrocities in terms of the details of their histories and to see that persons and groups are always the product of complexly interacting assemblage processes **Dangerous Visions and New Worlds** Andrew Nette, Iain McIntyre, 2021-10-26 Much has been written about the long Sixties the era of the late 1950s through the early 1970s It was a period of major social change most graphically illustrated by the emergence of liberatory and resistance movements focused on inequalities of class race gender sexuality and beyond whose challenge represented a major shock to the political and social status quo With its focus on speculation alternate worlds and the future science fiction became an ideal vessel for this upsurge of radical protest *Dangerous Visions and New Worlds* Radical Science Fiction 1950 to 1985 details celebrates and evaluates how science fiction novels and authors depicted interacted with and were inspired by these cultural and political movements in America and Great Britain It starts with progressive authors who rose to prominence in the conservative 1950s challenging the so called Golden Age of science fiction and its linear narratives of technological breakthroughs and space conquering male heroes The book then moves through the 1960s when writers including those in what has been termed the New Wave shattered existing writing conventions and incorporated contemporary themes such as modern mass media culture corporate control growing state surveillance the Vietnam War and rising currents of counterculture ecological awareness feminism sexual liberation and Black Power The 1970s when the genre reflected the end of various dreams of the long Sixties and the faltering of the postwar boom is also explored along with the first half of the 1980s which gave rise to new subgenres such as cyberpunk *Dangerous Visions and New Worlds* contains over twenty chapters written by contemporary authors and critics and hundreds of full color cover images including thirteen thematically organised cover selections New perspectives on key novels and authors such as Octavia Butler Ursula K Le Guin Philip K Dick John Wyndham Samuel Delany J G Ballard John Brunner Judith Merrill Barry Malzberg Joanna Russ and many others are presented alongside
