**DETERMINISM**

Traits like intelligence, personality, and behavior are primarily determined by genetic inheritance.

Behaviour and traits are shaped by external factors like upbringing, culture, and education.

**ENVIRONMENT**

**EVOLUTION**

Behaviors and characteristics are shaped by natural selection and are hardwired for survival.

Habits, preferences, and behaviours are learned through reinforcement and experience.

**LEARNING**

**INNATE**

Skills and predispositions, such as language acquisition, are inborn and emerge regardless of environment.

Family, peers, and societal norms play a critical role in shaping personality and values.

**SOCIETY**

**TWINS**

Research on identical twins often highlights the role of genetics in determining similarities, even when raised apart.

Differences in behaviour and achievement across cultures demonstrate the importance of environmental context.

*The "(no) negative evidence" problem: Nativist and social interactionist views on how children recover from grammatical errors* Bünyamin

Yuvarlak, 2021-03-23 Seminar paper from the year 2019 in the subject English Language and Literature Studies Linguistics grade 1.3 University of Bonn Institut für Anglistik Amerikanistik und Keltologie course Language Acquisition Psycholinguistik language English abstract This paper aims at exploring how the views on language acquisition have developed over time where they conflict each other and whether it is possible to position oneself on either side The nature vs nurture debate is an everlasting discussion not only in the area of linguistics but science in general This is what makes it particularly interesting because there is always new information to expect Furthermore it is an issue not limited to academic discourse only but one that appears in everyday conversation An interesting aspect of language acquisition more specifically the knowledge of language is the question if children arrive at such knowledge by the mere exposure to positive evidence i.e. the language of adults they are surrounded with or if negative evidence also has an impact i.e. children's knowledge of language is based on explicit or implicit feedback to whether an utterance was in some way incorrect The two terms will be defined and looked into in more detail in the second chapter In the following the correlation between the nature vs nurture debate and language acquisition will be explained first The respective chapter provides a brief insight into how the nativist approach developed mainly based on Chomsky's 1988 notion of Universal Grammar UG and the type of criticism it brought along It further explains the connection between the respective theories and the grammatical aspect of language acquisition In the last section the main problems of experience based language learning will be displayed and defined The third chapter starts with a section dedicated to where the particular view that humans need innate structures for a correct knowledge of language stems from It continues with a detailed look on the no negative evidence problem The non-existence of negative evidence and which role it plays in terms of language acquisition will be explored from different standpoints by nativists as well as non

nativists      Encyclopedia of Infant and Early Childhood Development Marshall M. Haith, Janette B. Benson, 2008-02-19  
Infancy is a unique period in that at no other state is there greater growth and development During this time growth is occurring at a physical level but equally impressive are the socio emotional and cognitive developments during this time Genetics the womb environment and the physical environment after birth all combine to impact the rate and manner of growth Who we ultimately become as individuals begins here Intended for university and public libraries the Encyclopedia of Infant and Early Childhood Development is the major reference work that provides a comprehensive entry point into all of the existing literature on child development from the fields of psychology genetics neuroscience and sociology The scope of this work is to understand the developmental changes when they occur why they occur how they occur and those factors that influence that development Although some medical information is included the emphasis is on normal growth and is primarily from a psychological perspective Cutting edge content will encompass the period of time from neo nates to age three Award winning Editors in Chief to ensure authoritative quality Organized alphabetically by topic for ease of reference Each article will include a glossary defining any unique terms Suggested readings at the end of each article provide a resource for additional information Extensively cross referenced within the work to enable reader access to full and relevant information related to their interests Online availability via ScienceDirect platform      **The Nature Study Movement** Kevin C.

Armitage, 2009 The first comprehensive history of the nature study movement and its significance to American environmental thought and politics Argues that nature study advocates through their systematic program or educating children about nature formed a critical foundation for the launching of the conservation movement      The Journal of NIH Research ,1996

*Color Perception. Is Whorf right? Do color terms affect color perception?* Melissa Grönebaum, 2014-02-04 Seminar paper from the year 2011 in the subject English Language and Literature Studies Other grade 1 3 University of Kassel language English abstract The Question if color perception is shaped by language or language is shaped by color perception is a classic nature versus nurture universalists versus relativity debate The Whorf hypothesis suggests the idea that humans at least trichromats view the world filtered through the lens of their native language The Universalists view instead holds that language does not affect the perception of color but the other way around Over the years both of these standardly opposed views have oscillated The following paper will review recent data and argue that none of the classic views can be fully supported Regarded by itself neither the one nor the other view is an answer to the question above Moreover the right answer should be regarded as a relativists universalists symbiosis Furthermore in this paper it will be analyze that Whorf was half right since tests on memory and reaction time have shown that language affects perception only in the right visual field
