**The Sociology of Labour Markets** Axel Van den Berg, 1997-01-01      *Culture of Prejudice* Judith C. Blackwell, Murray E. G. Smith, John S. Sorenson, 2008-09-01 The principal theme of the book is that social science is at its best and most exciting when it confronts and refutes cultures of prejudice intricate systems of beliefs and attitudes that sustain many forms of social oppression and that are themselves sustained by ignorance and fear of the unknown and the unfamiliar      **Families, Labour and Love** Maureen Baker, 2001 Annotation We think of family life as very personal but in fact it is shaped by influences well beyond our control Families Labour and Love identifies the ways in which family and personal life in three settler societies Australia New Zealand and Canada have been shaped by colonization immigration globalization demographic changes law and policy Baker shows that these three countries each a former colony developed similar family trends and similar family policies The family practices of indigenous people were largely overlooked as were those of recent immigrant groups Strongly gendered patterns of paid and unpaid work played a major role in family life Nevertheless local conditions also produced significant differences in family experiences among the three countries Containing numerous examples comparative data and textual sources Families Labour and Love provides a wide ranging analysis of the family that will appeal to students researchers and policy makers BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved      **International Labour Documentation** International Labour Office. Central Library and Documentation Branch, International Labour Organization. Central Library and Documentation Branch, 1999      *Labour Market and Social Protection Reforms in International Perspective* Giuliano Bonoli, 2017-07-05 Social protection systems and labour markets have undergone major changes in the past two decades Welfare states are being reformed scaled back and modernised labour markets at the same time are more precarious more feminised more unequal and throughout the OECD area older The interaction between labour markets and social protection has become increasingly crucial to the social and economic policy mix concerning unemployment the transformation of work the new poverty and even demographics Against this background an interdisciplinary team of leading labour market and social protection experts from various OECD countries examine the multifaceted aspects of the changing relationship between social protection systems and labour markets They identify and analyse key emerging issues such as the link between employment and social protection financing the adaptation of social protection systems to women s career patterns and the development of new forms of social protection that aim at promoting employment With practical policy guides and recommendations using case studies and comparative chapters this will be engaging reading for policy makers social actors and academics alike      **Challenging the Market** International Working Group on Labour Market Regulation and Deregulation, 2004 For two decades economic and social policy in most of the world has been guided by the notion that economies function best when they are fully exposed to competitive market forces In labour market policy this approach is reflected in the widespread emphasis on flexibility a

euphemism for the retrenchment of income support and social security the relaxation of labour market regulations and the enhanced power of private actors to determine the terms of the employment relationship These strategies have had marked effects on labour market outcomes leading to greater vulnerability and polarization and not always in ways that enhance worker centred flexibility The authors offer a more balanced analysis of the functioning and effects of labour market regulation and deregulation By questioning the underpinnings of the flexibility paradigm and revealing its often damaging impacts on different countries sectors and constituencies they challenge the conclusion that unregulated market forces produce optimal labour market outcomes The authors conclude with several suggestions for how labour policy could be reformulated to promote both efficiency and equity *Society*, 1996 *Women, Work, and Social Rights* Cecilia Benoit, 2000 The text is suitable for upper level sociology courses of work and gender as well as political science and women s studies courses Viewing gender relations in a historical context the book examines the importance of women s roles in both paid and unpaid work with a particular focus on the Canadian experience and its relation to other societies **Poverty, Social Assistance, and the Employability of Mothers** Maureen Baker, David John Tippin, 1999 While these countries are sometimes classified as liberal welfare states this book demonstrates that they vary considerably in terms of benefit development expectations concerning maternal employment and restructuring processes **BOOK JACKET The Sociology of Education in Canada** Terry Wotherspoon, 2009 This book offers a well rounded introduction to the sociological understanding of education analyzing key debates and issues with references to critical research and theories of education In this concise critical introduction Dr Terry Wotherspoon covers all aspects of the sociology of education in Canada including issues such as the sociology of teaching gender and race feminism and globalization The Sociology of Education in Canada is an appropriate core text for one semester third year sociology courses given its coverage of the history of the education system in Canada through to present day focus on theory and presentation of research recent data and perspectives

Grabb, Neil Guppy, 2004 Appropriate for courses in social inequality or social stratification Courses are usually found in sociology departments but sometimes also in history philosophy political science and economics departments Social Inequality in Canada Patterns Problems and Policies introduces students to the major aspects or dimensions of social inequality in Canada This collection of thirty one articles addresses topics that are central to a range of courses including Social Inequality Social Class Social Stratification Social Issues and Canadian Society The new edition has been revised to reflect important new research and changes in the nature of social inequality *Globalization and Society* Raymond Breton, Jeffrey G. Reitz, 2003-12-30 Globalization has been defined as a process in which the population of the world is increasingly bonded into a single society Although none of the contributors to this collection denies the thrust toward convergence that is implicit in globalizing processes each contributor also concludes that globalization encourages differentiation Integration in the global system is not a passive process In

different nations people analyze and interpret what is happening and respond by developing policies forming new institutions and changing existing ones They adopt broad cultural models in order to function effectively in the larger system and they also draw upon their particular traditions values institutions and resources to define a place that will be to their advantage economically politically and socio culturally As the studies presented in this book show integration in the world system may benefit a given society or may harm it it may entail changes to a society s culture but does not obliterate a society s distinctive characteristics

**Choices and Constraints in Family Life** Maureen Baker,2007 Using an interdisciplinary approach that draws on the latest research in sociology anthropology psychology and cultural studies this text expertly traces how families have changed over time and reveals how both personal preferences and social circumstances influence family relationships and society s shared perception of the family Publisher s description

**Restructuring Family Policies** Maureen Baker,2006 Recent years have seen significant changes in the social policies of many liberal welfare states this is especially true of social programs for families with children Increasingly governments are making family policy trade offs reducing support for some families but improving it for others Why are such trade offs occurring and how do governments differ in their approach to family social policy This study addresses these questions by examining the political demographic and socio economic factors influencing the restructuring of family related programs in OECD countries Adopting a feminist political economy approach Maureen Baker shows that while some governments encourage their citizens to see children as future resources and promote strong support for reproductive health programs child welfare services women s refugees subsidized childcare and pay equity others make these claims while simultaneously reducing family incomes through the deregulation of labour markets and restrictions on income support Ultimately Baker demonstrates that nation states with the best outcomes for families offer a variety of social supports which are increasingly important as global markets reduce economic security for some families while improving the financial situation of others This study also explores strategies employed by states to incorporate or resist international pressures and the reasons why some states tenaciously defend their family policy traditions while others restructure according to international guidelines Drawing from nation based research cross national studies and international data bases Restructuring Family Policies successfully integrates mainstream academic debates about restructuring welfare states with feminist research findings and current policy concerns
