*Social Theory and Religion* James A. Beckford, 2003-08-21 Many aspects of religion are puzzling these days This 2003 book looks at ways of improving our understanding of religious change by strengthening the links between social theory and the social scientific study of religion It clarifies the social processes involved in constructing religion and non religion in public and private life Taking illustrations of the importance of these boundaries from studies of secularisation religious diversity globalisation religious movements and self identity Beckford reviews social scientific knowledge about religion and assesses the strengths and weaknesses of a wide range of theoretical attempts to account for religious change and continuity The discussion goes in two directions The first is towards identifying

ways in which studies of religion would benefit from taking better account of themes in recent social theory The second is towards identifying reasons for social theorists to pay more attention to the findings of empirical investigations of religion

public expression This book addresses the relationship between religion and knowledge from a sociological perspective taking both religion and knowledge as phenomena located within ever changing social contexts It builds on historical foundations but offers a distinctive focus on the changing status of religious phenomena at the turn of the twenty first century Including critical engagement with live debates about intelligent design and the new atheism this collection of essays brings recent research on religious movements into conversation with debates about socialisation reflexivity and the changing capacity of social institutions to shape human identities Contributors examine religion as an institutional context for the production of knowledge as a form of knowledge to be transmitted or conveyed and as a social field in which controversies about knowledge emerge
