and use the countless information and communications resources available to them when conducting research. The answer to this question should be a major influence on the way information specialists develop information systems in their libraries. Unfortunately many librarians are not as familiar with the work information needs and communicating behavior of the research worker. *Information Seeking and Communications Behavior of Scientists and Engineers* looks at this question from several perspectives to give an overall view of how to best serve the needs of the scientific community. This book is an encouragement and a challenge to sci tech librarians to make an ever greater effort to understand the work of their users, the differing information channels and sources they employ and thus tailor the library's systems and services to best support their information seeking behavior.
