Solar Ethics:

A Textbook of Christian Ethics, 3rd Edition Robin Gill, 2006-09-14 Robin Gill's Textbook of Christian Ethics has been a popular course book with students and lecturers for over 20 years. Now in its third edition, this classic textbook has been completely revised to bring it up to date with recent developments in the field of Christian Ethics. All the popular features of the previous editions have been retained in this new edition. The book's main strength has always been its layout and structure. Integrating primary texts with explanatory material from the author, the book provides the student with a reader and textbook combined. The new edition focuses more strongly on current debates in all sections and expands on a variety of topics with contributions on natural law approaches, virtue ethics in a pluralistic postmodern world, the influential notion of the common good, just war theory, genetics and biotechnology, euthanasia and global justice, and sex and gender issues. Important modern contributions to Christian ethics are set out alongside classical texts from Augustine, Aquinas, and Luther. The modern writers range from thinkers such as Niebuhr, Barth, and Bonhoeffer to recent liberation and Third World theologians. Each series of texts is systematically analysed. The differing ethical positions and arguments are examined together with the social and historical factors which shaped them.

A Textbook of Christian Ethics Robin Gill, 2014-01-16 Robin Gill's *A Textbook of Christian Ethics* continues to be popular with students and lecturers; it is difficult to find another textbook in the field that combines primary texts with extensive analysis and commentary. This 4th edition has been extensively revised and it incorporates up to date developments in the field of Christian ethics. Gill retains all the popular features of the previous editions, including its layout and structure, and in this new edition, he also focuses on current debates, including such topics as global Christianity, global economics, euthanasia, and global justice and the environment.

Environmental Education, 2008-01-01 In *Environmental Education: Identity, Politics, and Citizenship*, the editors endeavor to present views of environmental educators that focus on issues of identity and subjectivity and how narrated lives relate to questions of learning, education, politics, justice, and citizenship. What is distinctive about this collection is that it highlights the views of Latin American scholars alongside those of scholars from Spain, Canada, New Zealand, Taiwan, South Africa, Australia, and the U.S. The result is a philosophically nuanced reading of the complexities of environmental education that begins to reshape the landscape in terms of ethics, ontology, epistemology, and politics. The collection bears the stamp of the location of its contributors and strongly reflects an activist, qualitative, and ethnographic orientation that emphasizes the ground for action, the identity of environmental actors, and the contribution that education in all its forms can make to sustainability and the cause of the environment. At the same time, contributors go beyond simple slogans and ideologies to question the accepted truths of this rapidly emerging field. Cover picture: Edgar Gonzales Gaudiano, Siem Reap, Cambodia. December 2007.

Solar Ethics Don Cupitt, 1995 Don Cupitt's ethics may seem strange and furious, but he says that this is a religious ethic to fit the truth about the world and our own life as we now understand it.
