Solar Noise Storms:

Solar Noise Storms E. O. Elgaroy, 2016-04-20 Solar Noise Storms examines the properties and features of solar noise storm phenomenon. The book also presents some theories that can be used to gain a better understanding of the phenomenon. The coverage of the text includes topics that cover the features and behavior of noise storms such as the observable features of noise storms, the relationship between noise storms and the observable features on the sun and ordered behavior of storm bursts in the time frequency plane. The book also covers the spectrum polarization and directivity of noise storms. The text will be of great use to astrophysicists, astronomers and other scientists concerned with the properties and behaviors of celestial bodies.

Astronomy and Astrophysics Abstracts S. Böhme, W. Fricke, H. Hefele, I. Heinrich, W. Hofmann, D. Krahn, V. R. Matas, L. D. Schmadel, G. Zech, 2013-12-14 *Astronomy and Astrophysics Abstracts* aims to present a comprehensive documentation of the literature concerning all aspects of astronomy, astrophysics and their border fields. It is devoted to the recording, summarizing and indexing of the relevant publications throughout the world. *Astronomy and Astrophysics Abstracts* is prepared by a special department of the Astronomisches Rechen Institut under the auspices of the International Astronomical Union. Volume 34 records literature published in 1983 and received before February 17, 1984. Some older documents which we received late and which are not surveyed in earlier volumes are included too. We acknowledge with thanks contributions of our colleagues all over the world. We also express our gratitude to all organizations, observatories and publishers which provide us with complimentary copies of their publications. Starting with Volume 33 all the recording, correction and data processing work was done by means of computers. The recording was done by our technical staff members Ms. Helga Ballmann, Ms. Mona El Choura and Ms. Monika Kohl. Mr. Martin Schlotelburg and Mr. Ulrich Oberall supported our task by careful proofreading. It is a pleasure to thank them all for their encouragement. Heidelberg, March 1984. The Editors.

On Short Periodic Variations in Solar Noise Storms on 200 Mc/s

Øivind HAUGE, 1958

Active Region Magnetospheres and Evolution of Solar Noise Storms James Nathan Kile, 1996

Rearrangements of the coronal magnetic field were observed as changes in loop structure in sequences of Yohkoh SXT images. The energy released in these magnetic realignments was observed to cause noise bursts at decimetric wavelengths. The noise bursts were spatially resolved from the actual noise storm and appeared to be correlated with radio and soft X-ray brightenings in active regions at the opposite footpoint of the coronal loop.
