The meteoric rise of the photovoltaic PV industry is an incredible story In 2013 Google's investments in PV systems totaled about half a billion dollars and Warren Buffet one of the famous investors invested 2.5 billion in the world's largest PV system in California These gigantic investments by major financial players were made only 40 years after the first two terrestrial PV companies Solarex and Solar Power Corporation were formed in the USA Back in 1973 the two companies employed 20 people and produced only 500 watts of PV power Now just 40 years later over a million people work in the PV industry The worldwide capacity of operating PV electric generators equals the capacity of about 25 nuclear power plants The PV industry is growing at an annual rate of 30 percent equivalent to about five new nuclear power plants per year Today solar electricity is a significant supplier of electricity needs to the extent that PV is forcing the restructuring of 100 year old electric power utilities This book describes how this happened and what lies ahead for PV power generation

History of the Electric Automobile Ernest Henry Wakefield, 1998-10-01 For more than a century people have attempted to harness electricity the clean and versatile fuel for personal transportation With impressive technical clarity and historical insight author Ernest Wakefield reviews these attempts in *History of the Electric Automobile Hybrid Electric Vehicles* He focuses exclusively on electric vehicles that harness the potential of electricity when combined with another energy source hybrid electric vehicles HEV The book details the historical development of capacitors engines flywheels fuel cells inductive charging and solar cells and the application of each to hybrid electric vehicles AIA Journal American Institute of Architects, 1979 *Electricity from Sunlight* Christopher Flavin, 1982

Solar photovoltaic cells have been called the ultimate energy technology environmentally benign and without moving parts solar cells directly convert sunlight into electricity Photovoltaic energy conversion is fundamentally different from all other forms of electricity generation Without turbines generators or other mechanical equipment it more closely resembles photosynthesis the biochemical process that forms the energy basis of life on earth A product of mid twentieth century solid state physics photovoltaics has attracted a wide range of supporters back to nature homesteaders environmentalists politicians and businessmen Increasingly photovoltaics is a world of big business with oil companies contributing a sizable share of the nearly half billion dollars invested worldwide in 1982 Although research and development still form much of the solar cell industry practical use of the technology is growing rapidly Photovoltaic technology cost reduction the photovoltaics industry government programs and international competition applications of photovoltaics technology solar power stations and the future of solar power are discussed in separate sections Author JN The Backyard Energy Projects Handbook William
