**Solomon Maimon** Meir Buzaglo,2002-05-19 The philosophy of Solomon Maimon 1753 1800 is usually considered an important link between Kant's transcendental philosophy and German idealism Highly praised during his lifetime over the past two centuries Maimon's genius has been poorly understood and often ignored Meir Buzaglo offers a reconstruction of Maimon's philosophy revealing that its true nature becomes apparent only when viewed in light of his philosophy of mathematics This provides the key to understanding Maimon's solution to Kant's quid juris question concerning the connection between intuition and concept in mathematics Maimon's original approach avoids dispensing with intuition as in some versions of logicism and formalism while reducing the reliance on intuition in its Kantian sense As Buzaglo demonstrates this led Maimon to question Kant's ultimate rejection of the possibility of metaphysics and simultaneously to suggest a unique type of skepticism

**Salomon Maimon's Theory of Invention** Idit Chikurel,2020-06-22 How can we invent new certain knowledge in a methodical manner This question stands at the heart of Salomon Maimon's theory of invention Chikurel argues that Maimon's contribution to the *ars inveniendi* tradition lies in the methods of invention which he prescribes for mathematics Influenced by Proclus commentary on Elements these methods are applied on examples taken from Euclid's Elements and Data Centering around methodical invention and scientific genius Maimon's philosophy is unique in an era glorifying the artistic genius known as *Geniezeit* Invention primarily defined as constructing syllogisms has implications on the notion of being given in intuition as well as in symbolic cognition Chikurel introduces Maimon's notion of analysis in the broader sense grounded not only on the principle of contradiction but on intuition as well In philosophy ampliative analysis is based on Maimon's logical term of analysis of the object a term that has yet to be discussed in Maimonian scholarship Following its introduction a new version of the question quid juris arises In mathematics Chikurel demonstrates how this conception of analysis originates from practices of Greek geometrical analysis

**Time and Eternity in Jewish Mysticism** Brian Ogren,2015-01-27 Time and eternity are concepts that have occupied an important place within Jewish mystical thought This present volume gives pride of place to these concepts and is one of the first works to bring together diverse voices on the subject It offers a multivalent picture of the topic of time and eternity not only by including contributions from an array of academics who are leaders in their fields

but by proposing six diverse approaches to time and eternity in Jewish mysticism the theoretical approach to temporality philosophical definitions the idea of time and pre existence the idea of historical time the idea of experiential time and finally the idea of eternity beyond time This multivocal treatment of Jewish mysticism and time as based on variant academic approaches is novel and it should lay the groundwork for further discussion and exploration *The Palgrave Handbook of German Idealism* M. Altman,2017-12-01 The Palgrave Handbook of German Idealism features essays from leading scholars on German philosophy It is the most comprehensive secondary source available covering not only the full range of work by Kant Fichte Schelling and Hegel but also idealists such as Reinhold and Schopenhauer critics such as Jacobi Maimon and the German Romantics *The Relevance of Romanticism* Dalia Nassar,2014-03-03 Since the early 1990s there has been a resurgence of interest in philosophy between Kant and Hegel and in early German romanticism in particular Philosophers have come to recognize that in spite of significant differences between the contemporary and romantic contexts romanticism continues to persist and the questions which the romantics raised remain relevant today The Relevance of Romanticism Essays on Early German Romantic Philosophy is the first collection of essays that offers an in depth analysis of the reasons why philosophers are and should be concerned with romanticism Through historical and systematic reconstructions the collection offers a deeper understanding and more encompassing picture of romanticism as a philosophical movement than has been presented thus far and explicates the role that romanticism plays or can play in contemporary philosophical debates The volume includes essays by a number of preeminent international scholars and philosophers Karl Ameriks Frederick Beiser Richard Eldridge Michael Forster Manfred Frank Jane Kneller and Paul Redding who discuss the nature of philosophical romanticism and its potential to address contemporary questions and concerns Through contributions from established and emerging philosophers discussing key romantic themes and concerns the volume highlights the diversity both within romantic thought and its contemporary reception Part One consists of the first published encounter between Manfred Frank and Frederick Beiser in which the two major scholars directly discuss their vastly differing interpretations of philosophical romanticism Part Two draws significant connections between romantic conceptions of history sociability hermeneutics and education and explores the ways in which these views can illuminate pressing questions in contemporary social political philosophy and theories of interpretation Part Three consists in some of the most innovative takes on romantic aesthetics which seek to bring romantic thought into dialogue with for instance contemporary Analytic aesthetics and theories of cognition mind The final part offers one of the few rigorous engagements with romantic conceptions science and demonstrates ways in which the romantic views of nature scientific experimentation and mathematics need not be relegated to historical curiosities *Schelling's Naturalism* Ben Woodard,2018-12-06 Using Schelling's philosophy Ben Woodard examines how an expanded form of naturalism changes how we conceive of the division between thought and world mathematics and motion sense and dynamics experiment and materiality as well as speculation and pragmatism Nature in
