Solution Sets of Differential Equations in Abstract Spaces Robert Dragoni, Paolo Nistri, Pietro Zecca, Jack W Macki, 1996-04-03 This book presents results on the geometric topological structure of the solution set S of an initial value problem $x' = f(t, x)$, $x(0) = x_0$ when f is a continuous function with values in an infinite dimensional space A a comprehensive survey of existence results and the properties of S e.g. when S is a connected set a retract an acyclic set is presented The authors also survey results on the properties of S for initial value problems involving differential inclusions and for boundary value problems This book will be of particular interest to researchers in ordinary and partial differential equations and some workers in control theory

Solution Sets for Differential Equations and Inclusions Smaïl Djebali, Lech Górniewicz, Abdelghani Ouahab, 2012-12-06 This monograph gives a systematic presentation of classical and recent results obtained in the last couple of years It comprehensively describes the methods concerning the topological structure of fixed point sets and solution sets for differential equations and inclusions Many of the basic techniques and results recently developed about this theory are presented as well as the literature that is disseminated and scattered in several papers of pioneering researchers who developed the functional analytic framework of this field over the past few decades Several examples of applications relating to initial and boundary value problems are discussed in detail The book is intended to advanced graduate researchers and instructors active in research areas with interests in topological properties of fixed point mappings and applications it also aims to provide students with the necessary understanding of the subject with no deep background material needed This monograph fills the vacuum in the literature regarding the topological structure of fixed point sets and its applications

Topological Structure of the Solution Set for Evolution Inclusions Yong Zhou, Rong-Nian Wang, Li Peng, 2017-10-31 This book systematically presents the topological structure of solution sets and attractability for nonlinear evolution inclusions together with its relevant applications in control problems and partial differential equations It provides readers the background material needed to delve deeper into the subject and explore the rich research literature In addition the book addresses many of the basic techniques and results recently developed in connection with this theory including the structure of solution sets for evolution inclusions with m dissipative operators quasi autonomous and non autonomous evolution inclusions and control systems evolution inclusions with the Hille Yosida operator functional evolution

inclusions impulsive evolution inclusions and stochastic evolution inclusions Several applications of evolution inclusions and control systems are also discussed in detail Based on extensive research work conducted by the authors and other experts over the past four years the information presented is cutting edge and comprehensive As such the book fills an important gap in the body of literature on the structure of evolution inclusions and its applications **Handbook of Differential**

Equations: Ordinary Differential Equations A. Canada,P. Drabek,A. Fonda,2006-08-21 This handbook is the third volume in a series of volumes devoted to self contained and up to date surveys in the theory of ordinary differential equations written by leading researchers in the area All contributors have made an additional effort to achieve readability for mathematicians and scientists from other related fields so that the chapters have been made accessible to a wide audience These ideas faithfully reflect the spirit of this multi volume and hopefully it becomes a very useful tool for research learning and teaching This volume consists of seven chapters covering a variety of problems in ordinary differential equations Both pure mathematical research and real world applications are reflected by the contributions to this volume Covers a variety of problems in ordinary differential equations Pure mathematical and real world applications Written for mathematicians and scientists of many related fields Set Valued Mappings with Applications in Nonlinear Analysis Donal O'Regan,Ravi P.

Agarwal,2002-09-26 Interest in the mathematical analysis of multi functions has increased rapidly over the past thirty years partly because of its applications in fields such as biology control theory and optimization economics game theory and physics Set Valued Mappings with Applications to Nonlinear Analysis contains 29 research articles from leading mathematicians in this area The contributors were invited to submit papers on topics such as integral inclusion ordinary and partial differential inclusions fixed point theorems boundary value problems and optimal control This collection will be of interest to researchers in analysis and will pave the way for the creation of new mathematics in the future Singularities of Solutions of Second-Order Quasilinear Equations Laurent Veron,1996-08-01 This text examines the singularity problem for solutions of elliptic and parabolic quasilinear equations of second order **Generalized Ordinary Differential Equations**

Delay Differential Evolutions Subjected to Nonlocal Initial Conditions Monica-Dana Burlică, Mihai Necula, Daniela Roșu, Ioan I. Vrabie, 2018-09-03 Filling a gap in the literature Delay Differential Evolutions Subjected to Nonlocal Initial Conditions reveals important results on ordinary differential equations ODEs and partial differential equations PDEs It presents very recent results relating to the existence boundedness regularity and asymptotic behavior of global solutions for differential equations and inclusions with or without delay subjected to nonlocal implicit initial conditions After preliminaries on nonlinear evolution equations governed by dissipative operators the book gives a thorough study of the existence uniqueness and asymptotic behavior of global bounded solutions for differential equations with delay and local initial conditions It then focuses on two important nonlocal cases autonomous and quasi autonomous The authors next discuss sufficient conditions for the existence of almost periodic solutions describe evolution systems with delay and nonlocal initial conditions examine delay evolution inclusions and extend some results to the multivalued case of reaction diffusion systems The book concludes with results on viability for nonlocal evolution inclusions **Nonlinear Differential Equations in**

Abstract Spaces V. Lakshmikantham, S. Leela, 1981 Many problems in partial differential equations which arise from physical models can be considered as ordinary differential equations in appropriate infinite dimensional spaces for which elegant theories and powerful techniques have recently been developed This book gives a detailed account of the current state of the theory of nonlinear differential equations in a Banach space and discusses existence theory for differential equations with continuous and discontinuous right hand sides Of special importance is the first systematic presentation of the very important and complex theory of multivalued discontinuous differential equations Mathematical Reviews ,2004
