Back to Sociological Theory Nicos P. Mouzelis,2016-07-27 Nicos Mouzelis argues against a marked tendency in present day sociology to conflate philosophy and sociological theory In trying to demonstrate the relative autonomy and specific logic of sociological theorising he draws from a variety of theoretical traditions in order to construct a set of interrelated concepts useful for bridging the

gulf between macro and micro sociologies Drawing examples from the sociology of development and from the theory of organisations the author shows concretely how the conceptual framework proposed can help the researcher to avoid both the reification of macro institutional structures and their reduction to the intersubjective understandings of micro actors
