Soft Computing In Industrial Electronics:

Soft Computing in Industrial Electronics Seppo J. Ovaska, Les M. Sztandera, 2002-04-23 This volume provides practicing engineers with new solutions to demanding real world problems It presents applications of soft computing to the field of industrial electronics in two categories electric power applications and emerging applications

Soft Computing in Industrial Electronics Seppo J. Ovaska, Les M. Sztandera, 2014-09-01 *Soft Computing in Industrial Electronics* Seppo J. Ovaska, Les M. Sztandera, 2013-06-05 It is expected that the use of soft computing will increase greatly in industrial applications because the conceptual structure of hard computing is much too precise in relation to the great imprecision of the world around us This book aims at attracting researchers and engineers both in the fields of industrial electronics IE and computational intelligence CI By approaching the different viewpoints of IE and CI people it is hoped to provide practicing engineers with new solutions to the demanding real world problems The applications are divided into two categories Electric Power Applications and Emerging Applications

The Industrial Electronics Handbook J. David Irwin, 1997-05-09 From traditional topics that form the core of industrial electronics to new and emerging concepts and technologies The Industrial Electronics Handbook in a single volume has the field covered Nowhere else will you find so much information on so many major topics in the field For facts you need every day and for discussions on topics you have only dreamed of The Industrial Electronics Handbook is an ideal reference

Soft Computing in Industrial Applications António Gaspar-Cunha, Ricardo Takahashi, Gerald Schaefer, Lino Costa, 2011-04-27 The 15th Online World Conference on Soft Computing in Industrial Applications held on the Internet constitutes a distinctive opportunity to present and discuss high quality papers making use of sophisticated Internet tools and without incurring in high cost and thus facilitating the participation of people from the entire world The book contains a collection of papers covering outstanding research and developments in the field of Soft Computing including evolutionary computation fuzzy control and neuro fuzzy systems bio inspired systems optimization techniques and application of Soft Computing techniques in modeling control optimization data mining pattern recognition and traffic and transportation systems

Soft Computing Pradip Debnath, Oscar Castillo, Poom Kumam, 2023-02-28 This book explores soft computing techniques in a systematic manner starting from their initial stage to recent developments in this area The book presents a survey of the existing knowledge and the current state of the art development through cutting edge original new contributions from the researchers *Soft Computing Recent Advances and Applications in Engineering and Mathematical Sciences* presents a survey of the existing knowledge and the current state of the art development through cutting edge original new contributions from the researchers As suggested by the title this book particularly focuses on the recent advances and applications of soft computing techniques in engineering and mathematical sciences Chapter 1 describes the contribution of soft computing techniques towards a new paradigm shift The subsequent chapters present a systematic application of fuzzy logic in mathematical sciences and decision making New research directions are also

provided at the end of each chapter The application of soft computing in health sciences and in the modeling of epidemics including the effects of vaccination are also examined Sustainability of green product development optimum design of 3D steel frame digitalization investment analysis in the maritime industry forecasting return rates of individual pension funds are among some of the topics where engineering and industrial applications of soft computing have been studied in the book The readers of this book will require minimum prerequisites of undergraduate studies in computation and mathematics This book is meant for graduate students faculty and researchers who are applying soft computing in engineering and mathematics New research directions are also provided at the end of each chapter

Proceedings of the National Seminar on Applied Systems Engineering and Soft Computing, 2000 **Power Electronics Converters and their Control for Renewable Energy Applications** Arezki Fekik, Malek Ghanes, Hakim Denoun, 2023-06-21 Power Electronics Converters and their Control for Renewable Energy Applications provides information that helps to solve common challenges with power electronics converters including loss by switching heating of power switches management of switching time improvement of the quality of the signals delivered by power converters and improvement of the quality of energy produced by renewable energy sources This book is of interest to academics researchers and engineers in renewable energy power systems electrical engineering electronics and mechanical engineering Includes important visual illustrations and imagery of concise circuit schematics and renewable energy applications Features a templated approach for step by step implementation of the new MPPT algorithm based on recent and intelligent techniques Provides methods for optimal harnessing of energy from renewable energy sources and converter topology synthesis

Recent Advances in Power Electronics and Drives Shailendra Kumar, Bhim Singh, Arun Kumar Singh, 2022-05-26 This book contains select proceedings of EPREC 2021 with a focus on power electronics and drives The book includes original research and case studies that present recent developments in power electronics focusing on power inverters and converters The book also consists of research work on electrical drives regulated power supplies operation of FACTS HVDC etc The book will be a valuable reference guide for beginners researchers and professionals interested in the advancements of power electronics and drives

Proceedings of the 6th International Conference on Electrical, Control and Computer Engineering Zainah Md. Zain, Mohd. Herwan Sulaiman, Amir Izzani Mohamed, Mohd. Shafie Bakar, Mohd. Syakirin Ramli, 2022-03-08 This book presents the proceedings of the 6th International Conference on Electrical Control and Computer Engineering InECCE 2021 held in Kuantan Pahang Malaysia on 23 August 2021 The topics covered are sustainable energy power electronics and drives and power engineering including distributed renewable generation power system optimization artificial computational intelligence smart grid power system protection and machine learning energy management and conservation The book showcases some of the latest technologies and applications developed to solve local energy and power problems in order to ensure continuity reliability and security of electricity for future generations It also links topics covered the sustainable

developed goals SDGs areas outlined by the United Nation for global sustainability The book will appeal to professionals scientists and researchers with experience in industry **Soft Computing** Devendra K. Chaturvedi,2008-07-20 This book is an introduction to some new fields in soft computing with its principal components of fuzzy logic ANN and EA The approach in this book is to provide an understanding of the soft computing field and to work through soft computing using examples It also aims to integrate pseudo code operational summaries and Matlab codes to present computer simulation to include real world applications and to highlight the distinctive work of human consciousness in machine Microcomputer Applications ,1986 *Industrial Electronics* ,1966 **IRE Transactions on Industrial Electronics** Institute of Radio Engineers.
