**Race** Denise Eileen McCoskey,2021-03-25 How do different cultures think about race In the modern era racial distinctiveness has been assessed primarily in terms of a person's physical appearance But it was not always so As Denise McCoskey shows the ancient Greeks and Romans did not use skin colour as the basis for categorising ethnic disparity The colour of one's skin lies

at the foundation of racial variability today because it was used during the heyday of European exploration and colonialism to construct a hierarchy of civilizations and then justify slavery and other forms of economic exploitation Assumptions about race thus have to take into account factors other than mere physiognomy This is particularly true in relation to the classical world In fifth century Athens racial theory during the Persian Wars produced the categories Greek and Barbarian and set them in brutal opposition to one another a process that could be as intense and destructive as black and white in our own age Ideas about race in antiquity were therefore completely distinct but as closely bound to political and historical contexts as those that came later This provocative book boldly explores the complex matrices of race and the differing interpretations of ancient and modern across epic tragedy and the novel Ranging from Theocritus to Toni Morrison and from Tacitus and Pliny to Bernal s seminal study Black Athena this is a powerful and original new assessment

**Landowners and Tenants in Roman Egypt** Jane Rowlandson,1996 Oxyrhynchus in Egypt is the best documented provincial city of the Roman empire This book uses the thousands of papyrus documents found there to examine how its urban landowners derived their wealth from the rural hinterland After an introductory chapter discussing the topography and agricultural conditions of the region the book analyses the conditions of tenure under which land was held the social status of landholders who included both men and women and the nature of their holdings the transmission of ownership by inheritance and sale and finally the role of short term leasing among methods of land management Together with social convention the system of land tenure rules of inheritance and the law of sale and lease formed an immensely complex web articulating the social relationships between landowners and tenants The papyri from Oxyrhynchus by illustrating in detail how individuals negotiated their way through this web provide an unparalleled insight into the character of landownership in a Roman province
