**Sophistical Rhetoric in Classical Greece** John Poulakos, 2012-12-07 An expert in rhetoric offers a new perspective on the ancient concept of sophistry exploring why Plato Isocrates and Aristotle found it objectionable In Sophistical Rhetoric in Classical Greece John Poulakos argues that a proper understanding of sophistical rhetoric requires a grasp of three cultural dynamics of the fifth century B C the logic of circumstances the ethic of competition and the aesthetic of exhibition Traced to such phenomena as everyday practices athletic contests and dramatic performances these dynamics defined the role of sophistical rhetoric in Hellenic culture and explain why sophistry has traditionally been understood as inconsistent agonistic and ostentatious In his discussion of ancient responses to sophistical rhetoric Poulakos observes that Plato Isocrates and Aristotle found sophistry morally reprehensible politically useless and theoretically incoherent At the same time they produced their own version of rhetoric that advocated ethical integrity political unification and theoretical coherence Poulakos explains that these responses and alternative versions were motivated by a search for solutions to such historical problems as moral uncertainty political instability and social disorder Poulakos concludes that sophistical rhetoric was as necessary in its day as its Platonic Isocratean and Aristotelian counterparts were in theirs

**Gorgias and the New Sophistic Rhetoric** Bruce McComiskey, 2002-01-31 In Gorgias and the New Sophistic Rhetoric Bruce McComiskey achieves three rhetorical goals he treats a single sophist's rhetorical technique in the context of the intellectual upheavals of fifth century BCE Greece thus avoiding the problem of generalizing about a disparate group of individuals he argues that we must abandon Platonic assumptions regarding the sophists in general and Gorgias in particular opting instead for a holistic reading of the Gorgianic fragments and he reexamines the practice of appropriating sophistic doctrines particularly those of Gorgias in light of the new interpretation of Gorgianic rhetoric offered in this book In the first two chapters McComiskey deals with a misconception based on selective and Platonic readings of the extant fragments that Gorgias's rhetorical technique involves the deceptive practice of manipulating public opinion This popular and ultimately misleading interpretation of Gorgianic doctrines has been the basis for many neosophistic appropriations The final three chapters deal with the nature and scope of neosophistic rhetoric in light of the non Platonic and holistic interpretation of Gorgianic rhetoric McComiskey postulates in his opening chapters He concludes by examining the future of communication studies to discover what roles neosophistic doctrines might play in the twenty first century McComiskey also provides a selective bibliography of scholarship on sophistic rhetoric and philosophy in English since 1900

Katula,Donovan J. Ochs,Forbes I. Hill,Prentice A. Mendor,1995 The purpose of history is to help people understand the present by providing a sense of continuity to their lives The history of western civilization begins in Ancient Greece So much of what we observe around us art architecture poetry drama and political systems is derived from the Greeks Even religious beliefs and beliefs about the solar system emanate from the writings of Greek and Roman philosophers Writing itself is a phenomenon of Greek civilization Students seeking to understand the social impact of technologies such as writing print and television must begin their study with figures such as Socrates who was one of the first to be concerned with the changes in social interaction and consciousness wrought by the emergence of writing on portable material For students of language an awareness of the classical world is particularly important The study of human discourse is an entirely western phenomenon As far as one can judge from surviving evidence the Greeks were the only people of the ancient world who endeavored to analyze the ways in which human beings communicate with each other Greece is therefore the birthplace of the art of discourse which includes not only rhetoric but also logic and grammar Although many other ancient civilizations produced literature only the Greeks produced analytic expository treatises that attempted to discover the actual bases of human communication Written treatises and school systems which allowed rhetorical discoveries to be transmitted to others enabled the Greeks and later the Romans to amass a considerable body of precepts to guide speakers and writers This body of precepts forms the basis for the study of rhetoric the art of human discourse This book provides a clear understanding of the classical roots of rhetoric While no single volume can account for every idea developed by the ancients on the art of rhetoric this book seeks to present the concepts that will most effectively provide today's student with a basis for understanding human communication The text contains essays about the period original treatises by ancient writers with modern analyses that elaborate on their rhetorical precepts and representative speeches given by celebrated orators of the ancient world In addition a bibliography of readings is presented for those who want to study this period more deeply [\*\*Twentieth-Century Rhetorics and Rhetoricians\*\*](#)

Michael G. Moran, Michelle Ballif, 2000-08-30 Rhetoric and rhetorical theory have been gaining in prominence throughout the 20th century. As leaders in all fields give careful attention to issues in communication, rhetoric becomes increasingly central to a range of disciplines. Many of these leaders have shaped rhetorical theory through their work in other fields and rhetoric becomes more and more difficult to define and delimit. This reference is a guide to major trends and developments in rhetoric and rhetorical theory during the last 100 years. Included are alphabetically arranged entries for major and minor rhetoricians such as Mikhail Bakhtin, Roland Barthes, Wayne Booth, Paul de Man, Jacques Derrida, Peter Elbow, and Linda Flower. Each entry is written by an expert contributor and includes a brief biography, an analysis of the figure's rhetorical theory, and a current bibliography of primary and secondary sources. The figures included represent a range of rhetorical schools. An extensive introduction discusses these schools and the volume concludes with extensive bibliographical material.

**Ancient Rhetorics for Contemporary Students** Sharon Crowley, Debra Hawhee, 2004 This rhetoric revives the classical strategies of ancient Greek and Roman rhetoricians and adapts them to the needs of contemporary writers and speakers. This is a fresh interpretation of the ancient canons of composing: invention, arrangement, style, memory, and delivery. It shows that rhetoric as it was practiced and taught by the ancients was an intrinsic part of daily life and of communal discourse about current events. This book gives special emphasis to classic strategies of invention, devoting separate chapters to stasis theory, common and special topics, formal topics, ethos, pathos, extrinsic proofs, and Aristotelian means of reasoning. The authors engage in discussion and their many contemporary examples of ancient rhetorical principles present rhetoric as a set of flexible situational practices. This practical history draws the most relevant and useful concepts from ancient rhetorics and discusses updates and offers them for use in the contemporary composition classroom. *Rhetoric and Centers of Power in the Greco-Roman World* John E. Tapia, 2009-06-16 Rhetoric and Centers of Power in the Greco Roman World From Homer to the Fall of Rome traces Greco Roman rhetoric as it evolved into a system that dramatically influences the development of Western culture Christian and later European educational and philosophical writers drew from principles which were largely Greek in origin although the Church encompassed many rituals that originated from early Roman pagan religions The Greeks fashioned a theory of public expression out of the oral recitations of Homer's Iliad and the Odyssey that Romans later refined into a technical process with managerial implications The rhetorical and historical scope of this work is roughly defined by the transformation of western rhetoric from its Homeric Greek origins to that point where the Emperor Theodosius in AD 395 divided the Roman Empire between his two sons with the official fall of the Roman Empire occurring in AD 476 *Bibliographisch repertorium van de wijsbegeerte*, 2006 *A History of Classical Greek Literature* John Pentland Mahaffy, 1880 *Bibliografisch Repertorium Van de Wijsbegeerte*, 2006
