The Annals Vol 464 November 1982 Middle And Late Life Transitions

Richard P. Olson

The Annals Vol 464 November 1982 Middle And Late Life Transitions:

Contemporary Marriage Kingsley Davis, 1986-08-20 This fascinating symposium is based on an assumption that no longer seems to need justification that the institution of marriage is today experiencing profound changes But the nature of those changes their causes and consequences is very much in need of explication The experts contributing to this volume bring a wide range of perspectives sociological anthropological economic historical psychological and legal to the problem of marriage in modern society Together these essays help illuminate a form of relationship that is both vulnerable and resilient biological and social a reflection of and an influence on other social institutions Contemporary Marriage begins with an important assessment of the revolution in marital behavior since World War II tracing trends in marriage age cohabitation divorce and fertility The focus here is primarily on the United States and on industrial societies in general Later chapters provide intriguing case studies of particular countries There is a recurrent interest in the impact on marriage of modernization itself but a number of essays probe influences other than industrial development such as strong cultural and historical patterns or legislation and state control Beliefs and expectations about marriage are explored and human sexuality and gender roles are also considered as factors in the nature of marriage Contemporary Marriage offers a rich spectrum of approaches to a problem of central importance The volume will reward an equally broad spectrum of readers interested in the meaning and future of marriage in our society

Midlife Journeys Richard P. Olson, 1996 With common sense and good humor Richard Olsen examines both the outer journeys and the inner journeys making clear throughout that the middle third of peoples lives the thirties forties and fifties is not the time to bemoan the past but rather to celebrate all that is around us Olsen points out how readers can use the maturity of midlife to strengthen their personal relationships maintain and increase their health and reevaluate their vocational and career goals

Middle and Late Life Transitions Felix M. Berardo, 1982 The articles in this volume reflect a reorientation in the ways that scientists have viewed human growth and development In this new perspective transitions are viewed as normal situations that are likely to confront anyone Whatever the situation each transition encompasses a bridging period often characterized by feeling of uncertainty and instability During this interval the person engages in various degrees of social and psychological adaptations to the changing situations in his or her life While such transitional processes have long been characteristic of the human condition it is only in recent years that social and behavioral scientists have begun to rectify out limited knowledge concerning how people and families negotiate a wide array of middle and late life transitions The current preoccupation with the transitions of middle and old age has evolved from several historical economic and demographic changes that have combined to shift our populations toward the middle of the age structure and have produced new stages in the life cycle The result is that today most Americans can expect to pass through these new stages including long term survival the empty nest period universal retirement and an extended term of widowhood in late life characterized by solitary living Many of these changes have in common that they involve periods of

imbalance often accompanied by strong emotions Lives must be restructured adaptations made and modifications in both mental and physical behavior must occur The descriptions of these transitions and the process by which adaptations to them are made are the subjects of the articles in this issue **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1983 **Parenting Across the Life Span** Jane Beckman Lancaster, Research on parenting through the life course has developed around two separate approaches Evolutionary biology provides fresh perspectives from life history theory using behavioral ecology and parental investment theory At the same time the social and behavioral sciences integrates research from long term studies of individual development and from the collection of life histories This path breaking book advances evolutionary life history research by integrating perspectives of these two approaches into a biosocial science of the life course It examines parenthood as a commitment extending throughout life and focuses on the impact on parental and child behavior of changes in the timing distribution and intensity of parental investment This perspective is particularly appropriate for research on parenting since the family is the universal human institution within which the bearing and rearing of children has been based and which transmits traditions beliefs and values to the young Journal of Contemporary Studies ,1982 **Reciprocity** Lawrence C. Becker,1990-08-15 Reciprocity is an exciting book it forces its readers to rethink some important issues in recent moral philosophy Ruth Anna Putnam Ethics By reciprocity Becker understands a complex disposition to make suitable return for the benefit we receive from others to resist the harm others inflict on us rather than retaliate for it and to make restitution for the harm we ourselves cause This is a clearly written book which makes fresh contributions to a number of topics A D M Walker Philosophical Books **Current Catalog** National Library of Medicine (U.S.),1983 First multi year cumulation covers six years 1965 70 Journal of Vocational Behavior ,1984 Future Survey Annual 1983 Michael Marien,1984-01-01 **Young Children and Social Policy** William M.
