Its population is expected to double by 2040

## **COVID in the Islands: A**

**comparative perspective on the Caribbean and the Pacific** Yonique Campbell, John Connell, 2021-10-29 This book provides the first wide ranging account of the impact of the COVID 19 pandemic in two contrasting island regions the Caribbean and the Pacific and in several islands and island states. It traces the complexity of effects and responses at different scales through the first critical year. Written by a range of scholars and practitioners working in the region the book focuses on six key themes public health the economies notably the collapse of tourism the revival of local agriculture and fishing and the rebirth of self reliance and even barter the rescue by remittances social tensions and responses public policy and future bubbles and regional connections. Even with marine borders that excluded the virus all island states were affected by COVID 19 because of a considerable dependence on tourism prompting urgent challenges for governance economic management and development as small states sought to balance lives against livelihoods in search of revitalisation or even a new normal

**Food Culture in the Caribbean** Lynn M. Houston, 2005-06-30 Food in the Caribbean reflects both the best and worst of the Caribbean's history. On the positive side Caribbean culture has been compared with a popular stew there called callaloo. The stew analogy comes from the many different ethnic groups peacefully maintaining their traditions and customs while blending together creating a distinct new flavor. On the negative side many foods and cooking techniques derive from a history of violent European conquest the importation of slaves from Africa and the indentured servitude of immigrants in the plantation system. Within this context students and other readers will understand the diverse island societies and ethnicities through their food cultures. Some highlights include the discussion of the Caribbean concept of making do using whatever is on hand or can be found the unique fruits and starches the one pot meal the technique of jerking meat and the preference for cooking outdoors. The Caribbean is known as the cradle of the Americas. The Columbian food exchange which brought products from the Caribbean and the Americas to the rest of the world transformed global food culture. Caribbean food culture has wider resonance to North Central and South America as well. The parallels in the food related evolution in the Americas include the

early indigenous foods and agriculture the import and export of foods the imported food culture of colonizers settlers and immigrants the intricacies of defining an independent national food culture the loss of the traditional agricultural system the trade issues sparked by globalization and the health crises prompted by the growing fast food industry This thorough overview of island food culture is an essential component in understanding the Caribbean past and present
