Rushefsky, 2015-05-20 Our public health system is primarily concerned with the promotion of health and the prevention of disease But while everyone may agree with these goals in principle in practice public health is a highly contentious policy arena that is inevitably entangled with sensitive issues ranging from occupational safety and environmental hazards to health education immunization and treatment of addiction and sexually transmitted disease Today however concern for protecting the population against bio terrorism and new epidemics such as SARS is tipping the balance back toward increased support for public health This book focuses on the politics policies and methodologies of public health and the twenty first century challenges to the public health system of the United States It explores the system's relatively weak position in the American political culture medical establishment and legal system scientific and privacy issues in public health and the challenges posed by ecological risk and the looming threat of bio terrorist attack Each chapter includes study questions The volume also includes a chronology of major laws and events in public health policy along with an extensive bibliography *Reader's Guide to the History of Science* Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn **The Apocalypitics** Edith Efron, 1985 Current Catalog National Library of Medicine (U.S.), *Environmentally Induced Cancer and the Law* Frank B. Cross, 1989-06-12 Frank Cross provides a comprehensive treatment of the widely feared problem of environmentally induced cancer The author takes a threefold approach to the problem first examining the cancers themselves and what is known about their causes and then exploring both the government's regulation of these environmental pollutants and the legal remedies available to victims of such cancers Throughout new proposals for

regulating carcinogens and compensating the victims of environmental cancer are discussed In Part I Cross addresses the significant and unique problems presented by the disease of cancer demonstrating that the limits of scientific knowledge the absence of a demonstrable safe threshold of exposure and other special features of the disease create a unique cancer problem for government The second section examines the various risk management approaches from which a regulatory agency may choose As Cross demonstrates government must identify carcinogens assess the risks they present and choose control methods a complex task made even more difficult by the conflicting claims of industry and environmental groups He concludes this section by proposing future approaches for more effective regulation including prioritization of the greatest hazards and adoption of a moderate feasibility based control program The final chapters explore legal obstacles to victim compensation and argue for fundamental changes in existing common law doctrines to enhance the ability of victim plaintiffs to recover adequate damages Cancer and the Environment Joan Nordquist,1999 **Environmental Policy in the**

The Cancer Wars Robert Proctor,1995-03-10 If cigarettes cause up to 30 percent of all cancer why has so little been done to discourage their production And why does the National Cancer Institute spend only 3 percent of its budget on antitobacco efforts **Monetary Theory and Monetary Policy** Karl Brunner,1997 Monetary Theory and Monetary Policyis the second collection of essays by Karl Brunner one of the most prominent monetary economists of the twentieth century It demonstrates the importance of economic analysis for the development of appropriate economic policies The book opens with a preface by Thomas Lys which provides the reader with an account of both Karl Brunner s personal and academic life This is developed further in an introduction by Allan H Meltzer who focuses on Brunner s intellectual development Issues discussed in this collection include the question of whether monetarism has failed monetary policy persistent inflation deficits and interest rates high powered money the monetary base the money supply international monetary order and the question of whether supply side economics is sufficient for comprehensive policymaking This selection will be welcomed by academics students and policymakers interested in monetary economics and the work of Karl Brunner Forthcoming Books Rose Army,1990 Book Review Digest ,1985 Human Biology Raymond Pearl,1985 Includes section Recent literature useful in the study of human biology **Don't Breathe the Air** Scott Hamilton Dewey,2000 With the menace of smog hanging over an increasing number of American cities in the 1960s Clean Air became a rallying cry for a new environmentalism Citizen activists rallied passionately to force state and local governments to address problems that threatened human health and even survival In Don t Breathe the Air Scott H Dewey traces the history of air pollution control efforts focusing on the decade of the sixties and describes how local efforts helped create both the modern environmental movement and federal environmental policy Early in the fight against air pollution activists recognized the need for intergovernmental solutions

Because air was mobile no single jurisdiction could address problems alone Dewey has chosen three case studies involving different sources of air pollution and different configurations of governments to discover how jurisdictional issues affected environmental organization and the ability to clean up the air First Dewey looks at Los Angeles arguably the birthplace of modern air pollution Because much of the city s air pollution was automobile related Los Angeles had to enlist help from the State of California to regulate both the industry and car owners Relatively speaking Los Angeles was a success story one that set important precedents and illustrated a pattern of local concerns entailing action in a larger arena Dewey then turns to New York City a city plagued by air pollution problems that involved more than one state and required regional action In its comparative lack of success in dealing with its atmospheric woes compounded by the pollution descending on it from neighboring New Jersey New York was more typical of the overall national pattern than was Los Angeles Finally Dewey examines central Florida where a rural agricultural area suffered from severe industrial air pollution that required a multi jurisdictional solution and a confrontation with influential phosphate manufacturers that all levels of government were long reluctant to tackle Don t Breathe the Air is a comprehensive look at the role of air pollution and citizen activism during the rise of environmentalism in the post World War II United States It clearly lays out the issues and strategies that prepared the way for the federal clean air legislation of the 1970s **ACSH News & Views** ,1987
