### **The Archaeology of the Medieval Cathedral and Priory of St Mary,**

**Coventry** Margaret Rylatt, Paul Mason, 2003 This report describes excavations at the St Mary's Priory and cathedral church Coventry conducted between 1999 and 2003 as part of the Phoenix Initiative Coventry's Millennium Project. The Priory was located on the site of a late Saxon Abbey whose benefactors were Leofric Earl of Mercia and his wife Lady Godiva. Its church became a cathedral in the early 12th C AD and the priory grew to become one of the largest monastic communities in the region. It was suppressed on 15th January 1539 and the cathedral became the only one in the Kingdom to be destroyed as a result of dissolution. This excavation report describes the history of the buildings and then presents new discoveries about the cathedral the monastic house the service buildings and priory mill. ### **St Paul's Cathedral** John

Schofield, 2016-09-30 This is the first volume concerned solely with the archaeology of a major late 17th century building in London and the major changes it has undergone. St Paul's Cathedral in the City of London was built in 1675-1711 to the designs of Sir Christopher Wren and has been described as an iconic building many times. In this major new account John Schofield examines the cathedral from an archaeological perspective reviewing its history from the early 18th to the early 21st century as illustrated by recent archaeological recording documentary research and engineering assessment. A detailed account of the construction of the cathedral is provided based on a comparison of the fabric with voluminous building accounts which have survived and evidence from recent archaeological investigation. The construction of the Wren building and its embellishments are followed by the main works of later surveyors such as Robert Mylne and Francis Penrose. The 20th century brought further changes and conservation projects including restoration after the building was hit by two

bombs in World War II and all its windows blown out The 1990s and first years of the present century have witnessed considerable refurbishment and cleaning involving archaeological and engineering works Archaeological specialist reports and an engineering review of the stability and character of the building are provided
