## **The Archeology Of The Frivolous Reading Condillac:**

*Archeologie Du Frivole* Jacques Derrida, 1987-01-01 In 1746 the French philosophe Condillac published his Essay on the Origin of Human Knowledge one of many attempts during the century to determine how we organize and validate ideas as knowledge In investigating language especially written language he found not only the seriousness he sought but also a great deal of frivolity whose relation to the sober business of philosophy had to be addressed somehow If the mind truly reflects the world and language reflects the mind why is there so much error and nonsense Whence the distortions How can they be remedied In The Archeology of the Frivolous Jacques Derrida recoups Condillac's enterprise showing how it anticipated consciously or not many of the issues that have since stymied epistemology and linguistic philosophy If anyone doubts that deconstruction can be a powerful analytic method try this *Jacques Derrida (Routledge Revivals)* William Schultz, Lewis L.B. Fried, 2016-06-17 First published in 1992 this book represents the first major attempt to compile a bibliography of Derrida's work and scholarship about his work It attempts to be comprehensive rather than selective listing primary and secondary works from the year of Derrida's Master's thesis in 1954 up until 1991 and is extensively annotated It arranges under article type a huge number of works from scholars across numerous fields reflecting the interdisciplinary and controversial nature of Deconstruction The substantial introduction and annotations also make this bibliography in part a critical guide and as such will make a highly useful reference tool for those studying his philosophy *Enlightenment Aberrations* David W. Bates, 2018-09-05 In Enlightenment Aberrations David W Bates shows that error was a complex important and by no means entirely negative concept in Enlightenment thought one that had a decisive influence in revolutionary debates on political identity and national history What can it mean to write a history of error In Bates's view all philosophy insofar as its project is the search for truth begins in error If truth is posited as a goal to be attained not as a given of some kind then error assumes a central role in the quest for truth Going beyond both liberal celebrations and postmodern critiques of Enlightenment reason Bates reveals just how crucial the problematic relation between human wandering and the mystery of truth was in eighteenth century thought The author draws on a wide range of Enlightenment thinkers including Etienne Bonnot de Condillac Jean d'Alembert Marie Jean Antoine Nicolas Caritat Marquis de Condorcet Jean Jacques Rousseau and Charles Bonnet showing how they wrestled with the risk and promise of error He then demonstrates how the concept of error and its dialectical relationship to truth played out in the political culture of the French Revolution particularly in the Terror In the final chapters Bates looks at the post revolutionary transformations of the Enlightenment discourse of error and its subsequent history in modern European thought *The Honor of Thinking* Rodolphe Gasché, 2007 The Honor of Thinking evaluates the concepts and discourses of critique theory and philosophy in light of the exigencies of what Martin Heidegger and the French post Heideggerian thinkers have established about the nature and the tasks of thinking *Models of the History of Philosophy* Gregorio Piaia, Giovanni Santinello, 2015-08-24

This is the third volume of Models of the History of Philosophy a collaborative work on the history of the history of philosophy dating from the Renaissance to the end of the nineteenth century The volume covers a decisive period in the history of modern thought from Voltaire and the great Encyclop die of Diderot and d Alembert to the age of Kant i e from the histoire de l esprit humain animated by the idea of progress to the a priori history of human thought The interest of the philosophes and the Kantians Buhle and Tennemann in the study and the reconstruction of the philosophies of the past was characterized by a spirit that was highly critical but at the same time systematic The material is divided into four large linguistic and cultural areas the French Italian British and German The detailed analysis of the 35 works which can be considered to be general histories of philosophy is preceded and accompanied by lengthy introductions on the historical background and references to numerous other works bordering on philosophical historiography

**Genetic Codes of Culture?** William R.

Schultz,2016-08-19 In this text first published in 1994 the author examines the interdisciplinary significance of the theory of science literature and philosophy according to the figures who achieved prominence in those fields Kuhn Bloom and Derrida Each scholar s theory is discussed in terms of its major concepts and the book then relates their fields within the context of deconstruction s interdisciplinary movement This title will be of interest to students of literature and philosophy
