The Psychology of Extreme Violence Clare Allely, 2020-04-14 Featuring a unique overview of the different forms of extreme violence this book considers the psychology of extreme violence alongside a variety of contributing factors such as brain abnormalities in homicide offenders. Featuring several contemporary real world case studies this book offers insight into the psychology of serial homicide offenders, mass shooters, school shooters and lone actor terrorists. The main purpose of this book is not to glorify or condemn the actions of these individuals but to attempt to explain the motivations and circumstances that inspire such acts of extreme violence. By adopting a detailed case study approach it aims to increase our understanding of the specific motivations and psychological factors underlying extreme violence. Using nontechnical language this book is the ideal companion for students, researchers and forensic practitioners interested in the multidisciplinary nature of extreme violence. This book will also be of interest to students taking courses on homicide, mass shooting, school shooting, terrorism, forensic psychology and criminology and criminal justice.
