Soul Solution:

Soul Solution Katherine McIntyre, 2015-07-24 For Erik Anderson the Copenhagen line is his curse He takes the train every night en route to collect souls Like any lovelorn fool he bargained his own long ago and now pays the price a lifetime of loneliness as a grim reaper Stay distant that s been his mantra and what keeps him sane Until Mina Castner drops into his life like a whirlwind one spilled drink leading to staying up until dawn with the woman He believed one night couldn t hurt but he sorely underestimated her determination Every encounter between them is a reprieve from the guilt of reaping souls every night but it can t last Even if she sparks long buried feelings and even if her sheer presence intoxicates him he can t let this continue For humans his touch is poison and if he slips up it could cost her life [Damascius' Problems and Solutions](#)

[Concerning First Principles](#) Damaskios, 2010-10-28 Damascius was head of the Neoplatonist academy in Athens when the Emperor Justinian shut its doors forever in 529 His work Problems and Solutions Concerning First Principles is the last surviving independent philosophical treatise from the Late Academy Its survey of Neoplatonist metaphysics discussion of transcendence and compendium of late antique theologies make it unique among all extant works of late antique philosophy It has never before been translated into English The Problems and Solutions exhibits a thorough going critique of Proclean metaphysics starting with the principle that all that exists proceeds from a single cause proceeding to critique the Proclean triadic view of procession and reversion and severely undermining the status of intellectual reversion in establishing being as the intelligible object Damascius investigates the internal contradictions lurking within the theory of descent as a whole showing that similarity of cause and effect is vitiated in the case of processions where one order e g intellect gives rise to an entirely different order e g soul Neoplatonism as a speculative metaphysics posits the One as the exotic or extopic explanans for plurality conceived as immediate present to hand and therefore requiring explanation Damascius shifts the perspective of his metaphysics he struggles to create a metaphysical discourse that accommodates insofar as language is sufficient the ultimate principle of reality After all how coherent is a metaphysical system that bases itself on the Ineffable as a first principle Instead of creating an objective ontology Damascius writes ever mindful of the limitations of dialectic and of the pitfalls and snares inherent in the very structure of metaphysical discourse **The Inspired Word** Alfred Colo, 2011-05-03

[Event Solutions](#) , 2002 *The Soul's Upward Yearning* Robert Spitzer, S.J., Ph.D., 2015-10-03 Western culture has been moving away from its Christian roots for several centuries but the turn from Christianity accelerated in the 20th century At the core of this decline is a loss of a sense of our own transcendence Scientific materialism has so seriously impacted our belief in human transcendence that many people find it difficult to believe in God and the human soul This anti transcendent perspective has not only cast its spell on the natural sciences psychology philosophy and literature it has also negatively impacted popular culture through the writings of Richard Dawkins Daniel Dennett and many others The warning signs of this loss of transcendence have been expressed by thinkers as diverse as Carl Jung psychiatrist Mircea Eliade historian of religion

Gabriel Marcel philosopher C S Lewis and J R R Tolkien These warnings were validated by a 2004 study in the American Journal of Psychiatry which showed that the absence of religion alone was responsible for a marked increase in suicide rates sense of meaningless substance abuse separation from family and other psychiatric problems Thus the loss of transcendence is negatively affecting not only individuals sense of happiness dignity ideals virtues and destiny but also the culture Ironically the evidence for transcendence is greater today than in any other period in history The problem is this evidence has not been compiled and propagated Fr Spitzer s book provides a bright light in the midst of this cultural darkness by presenting both traditional and contemporary evidence for God and a transphysical soul from several major sources He also shows how human consciousness and intelligence is completely special and cannot be replicated by artificial intelligence or animal consciousness We are transcendent beings with souls capable of surviving bodily death self reflective beings aware of perfect truth love goodness and beauty We are beings with an unrestricted capacity to know and create science law culture art music literature and so much more The evidence reveals that we have the dignity of being created in the very image of God and if we underestimate it we will undervalue one another underlive our lives and underachieve our destiny This work is the most comprehensive treatment of human transcendence available today **Moments of Soul** John D. Sommer,2000 Moments of Soul is a philosophical inquiry into four distinctive powers of humanity free choice personal identity honor and faith The theme through all four powers is the paradox of soul as the power of attraction between persons not the hidden attribute of an individual While the inquiry aims to develop our powers of mutual attraction it exposes some common mistakes of our times such as reducing mind to brain function mixing personal identity with ethnic pride and confusing faith with religious belief The method is to avoid making images or analogies in order to state clear problems and find their solutions

The Oxford Handbook of Islamic Philosophy Khaled El-Rouayheb,Sabine Schmidtke,2016-10-03 The study of Islamic philosophy has entered a new and exciting phase in the last few years Both the received canon of Islamic philosophers and the narrative of the course of Islamic philosophy are in the process of being radically questioned and revised Most twentieth century Western scholarship on Arabic or Islamic philosophy has focused on the period from the ninth century to the twelfth It is a measure of the transformation that is currently underway in the field that unlike other reference works the Oxford Handbook has striven to give roughly equal weight to every century from the ninth to the twentieth The Handbook is also unique in that its 30 chapters are work centered rather than person or theme centered in particular taking advantage of recent new editions and translations that have renewed interest and debate around the Islamic philosophical canon The Oxford Handbook of Islamic Philosophy gives both the advanced student and active scholar in Islamic philosophy theology and intellectual history a strong sense of what a work in Islamic philosophy looks like and a deep view of the issues concepts and arguments that are at stake Most importantly it provides an up to date portrait of contemporary scholarship on Islamic
