A Handbook for Politics Edward McPherson, 1872. *Comparison of Asian International Arbitration Rules* Simpson Thacher & Bartlett, 2003-09-01. This is a unique work for those who are involved in international arbitration. Utilizing a chart of parallel provisions, it compares the leading sets of Asian international arbitration rules. It was first created by Simpson as an internal reference tool. The

Comparison of Asian International Arbitration Rules will be of great value in three distinct areas of international arbitration practice First in assisting clients in selecting arbitration rules and drafting arbitration provisions for their international commercial contracts For example where a client seeks to include a provision governing a specific procedural issue in an arbitration clause the chart provides easy reference to the different provisions used in the leading sets of international arbitration rules Second the chart will assist in developing arguments on procedural issues in connection with representation of clients in international arbitration proceedings Finally comparison will facilitate evaluation by scholars practitioners and the institutions themselves of the desirability and effectiveness of particular provisions in light of comparable ones Compiling this chart was a challenging process primarily because the various sets of international arbitration rules deal with specific procedural issues very differently Additionally one of the most difficult tasks in compiling this chart was deciding which sets of Asian international arbitration rules to include in the chart in light of space and formatting limitations Ultimately various factors were considered in deciding which sets of rules to include in the chart The China International Economic and Trade Arbitration Commission CIETAC Hong Kong International Arbitration Centre HKIAC Japan Commercial Arbitration Association JCAA Korean Commercial Arbitration Board KCAB and Singapore International Arbitration Centre SIAC rules were included as leading sets of institutional Asian international arbitration rules Other Asian institutional arbitration rules are not included simply for reasons of manageability and space The arbitration rules of the United Nations Commission on International Trade UNCITRAL were included as the preeminent set of ad hoc international arbitration rules which are frequently used by parties in Asia as well as by Asian arbitration organizations such as the HKIAC as the basis for their institutional arbitration rules The structure of this chart follows the structure of the second edition of our chart on international arbitration rules in part to facilitate the use of the two charts together Like the second edition of the chart on international arbitration rules this chart contains an index of topics with page references to assist in locating subjects in the rules and the full texts of the sets of arbitration rules are included in an appendix for ease of reference
