Fürst, 1998 Architects and artists have always acknowledged over the centuries that Rome is rightly called the eternal city  
Rome is eternal above all because it was always young always in its prime Here the buildings that defined the West appeared  
over more than 2000 years here the history of European architecture was written The foundations were laid even in ancient  
Roman times when the first attempts were made to design interiors and thus make space open to experience as something  
physical And at that time the Roman architects also started to develop building types that are still valid today thus creating  
the cornerstone of later Western architecture In it Rome's primacy remained unbroken whether it was with old St Peter's as  
the first medieval basilica or new St Peter's as the building in which Bramante and Michelangelo developed the High  
Renaissance or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as  
Vienna Bohemia and Lower Franconia and also with Modern buildings of which there are many unexpected pearls to be  
found in Rome All this is comprehensible only if it is presented historically i.e. in chronological sequence and so the guide has  
not been arranged topographically as usual but chronologically This means that one is not led in random sequence from a  
Baroque building to an ancient or a modern one but the historical development is followed successively Every epoch is  
preceded by an introduction that identifies its key features This produces a continuous lavishly illustrated history of the  
architecture of Rome and thus at the same time of the whole of the West Practical handling is guaranteed by an alphabetical  
index and detailed maps whose information does not just immediately illustrate the historical picture but also makes it  
possible to choose a personal route through history     **The Architecture of Michelangelo with a Catalogue of**
