## **The Archaeology Of Beringia:**

**American Beginnings** Frederick Hadleigh West, Constance F. West, 1996-12 During the last Ice Age a thousand mile wide land bridge connected Siberia and Alaska creating the region known as Beringia Over twelve thousand years ago a procession of large mammals and the humans who hunted them crossed this bridge to America Much of the Russian evidence for this migration has until now remained largely inaccessible to American scholars *American Beginnings* brings together for the first time in one volume the most up to date archaeological and palaeoecological evidence on Beringia from both Russia and America An invaluable resource It will no doubt remain the key reference book for Beringia for many years to come Steven Mithen *Journal of Human Evolution* Extraordinary The fifty six contributors represent the most prominent American and Russian researchers in the region Choice Publication of this well illustrated compendium is a great service to early American and especially Siberian Upper Paleolithic archaeology Nicholas Saunders *New Scientist* This is a great book perhaps the greatest contribution to the archaeology of Beringia that has yet been published This is the kind of book to which archaeology should aspire Herbert D G Maschner *Antiquity* *The Archaeology of Beringia* Frederick H. West, *The Archaeology of Beringia* Frederick Hadleigh West, 1981 Examines the ancient province of Beringia and its role in shaping the floristic and faunistic history of north western North America and Northeastern Siberia *Human Ecology of Beringia* John F. Hoffecker, Scott A. Elias, 2007 Twenty five thousand years ago sea level fell more than 400 feet below its present position as a consequence of the growth of immense ice sheets in the Northern Hemisphere A dry plain stretching 1 000 miles from the Arctic Ocean to the Aleutians became exposed between northeast Asia and Alaska and across that plain most likely walked the first people of the New World This book describes what is known about these people and the now partly submerged land named Beringia which they settled during the final millennia of the Ice Age Humans first occupied Beringia during a twilight period when rising sea levels had not yet caught up with warming climates Although the land bridge between northeast Asia and Alaska was still present warmer and wetter climates were rapidly transforming the Beringian steppe into shrub tundra This volume synthesizes current research some previously unpublished on the archaeological sites and rapidly changing climates and biota of the period suggesting that the absence of woody shrubs to help fire bone fuel may have been the barrier to earlier settlement and that from the outset the Beringians developed a postglacial economy similar to that of later northern interior peoples The book opens with a review of current research and the major problems and debates regarding the environment and archaeology of Beringia It then describes Beringian environments and the controversies surrounding their interpretation traces the evolving adaptations of early humans to the cold environments of northern Eurasia which set the stage for the settlement of Beringia and provides a detailed account of the archaeological record in three chapters each of which is focused on a specific slice of time between 15 000 and 11 500 years ago In conclusion the authors present an interpretive summary of the human ecology of Beringia and discuss its relationship to the

wider problem of the peopling of the New World      Arrows and atl atls E. James Dixon,2013      **The Archaeology of Native North America** Dean Snow,Nancy Gonlin,Peter Siegel,2019-07-30 The Archaeology of Native North America presents the ideas evidence and debates regarding the initial peopling of the continent by mobile bands of hunters and gatherers and the cultural evolution of their many lines of descent over the ensuing millennia The emergence of farming urban centers and complex political organization paralleled similar developments in other world areas With the arrival of Europeans to North America and the inevitable clashes of culture colonizers and colonists were forever changed which is also represented in the archaeological heritage of the continent Unlike others this book includes Mesoamerica and the Caribbean thus addressing broad regional interactions and the circulation of people things and ideas This edition incorporates results of new archaeological research since the publication of the first edition a decade earlier Fifty four new box features highlight selected archaeological sites which are publicly accessible gateways into the study of North American archaeology The features were authored by specialists with direct knowledge of the sites and their broad importance Glossaries are provided at the end of every chapter to clarify specialized terminology The book is directed to upper level undergraduate and graduate students taking survey courses in American archaeology as well as other advanced readers It is extensively illustrated and includes citations to sources with their own robust bibliographies leading diligent readers deeper into the professional literature The Archaeology of Native North America is the ideal text for courses in North American archaeology

**Prehistoric Archaeology on the Continental Shelf** Amanda M. Evans,Joseph C. Flatman,Nicholas C. Flemming,2014-05-05 The chapters in this edited volume present multi disciplinary case studies of prehistoric archaeological sites located on now submerged portions of the continental shelf Each chapter represents an extension of the known prehistoric record beyond the modern shoreline Case studies represent central themes of landscape change climate change and societal development using new technologies for mapping monitoring and managing these sites      The Review of Archaeology Frederick Hadleigh West,Constance F. West,1999      Palaeolandscapes in Archaeology Mike T. Carson,2021-11-29 What can we learn about the ancient landscapes of our world and how can those lessons improve our future in the landscapes that we all inhabit Those questions are addressed in this book through a practical framework of concepts and methods combined with detailed case studies around the world The chapters explore the range of physical and social attributes that have shaped and re shaped our landscapes through time International authors contributed the latest results of investigating ancient landscapes or palaeolandscapes in diverse settings of tropical forests deserts river deltas remote islands coastal zones and continental interiors The case studies embrace a broadly accommodating approach of combining archaeological evidence with other avenues of research in earth sciences biology and social relations Individually and in concert the chapters offer new perspectives on what the world s palaeolandscapes looked like how people lived in these places and how communities have engaged with long term change in their natural and cultural environments through

successive centuries and millennia The lessons are paramount for building responsible strategies and policies today and into the future noting that many of these issues from the past have gained more urgency today This book reaches across archaeology ecology geography and other studies of human environment relations that will appeal to general readers Specialists and students in these fields will find extra value in the primary datasets and in the new ideas and perspectives Furthermore this book provides unique examples from the past toward understanding the workings of sustainable landscape systems
