## **The Archaeology Of London:**

**London Under Ground** Ian Haynes, Harvey Sheldon, Lesley Hannigan, 2000 London's archaeology is as complex and varied as the city is today These seventeen papers survey twenty five years of London archaeology in the city and its environs from prehistory to 1800 Contents Introduction H Sheldon and I Haynes Towards the development of a settled landscape in London c 4000 1200 BC J Cotton Changing approaches to the first millennium N Merriman The Roman city M Hassall Art in Roman London M Henig Religion I Haynes Evidence from Roman London's cemeteries B Barber and J Hall Roman Southwark H Sheldon Roads roadside settlements and their countryside D G Bird Early and middle Saxon archaeology R Cowie Late Saxon and Norman London J Clark Buildings and defences 1200 1600 J Schofield Medieval pottery A Vince Tudor and Stuart playhouses S Blatherwick Morturay archaeology to 1800 V Harding Environmental archaeology J Sidell Archaeology of London 1973 1997 R Cowie and R Densem

**The Archaeology of Greater London** Trevor Brigham, 2000 It is nearly 25 years since the last major survey of the archaeology of the London region was written In that quarter century some of the most extraordinary evidence of our past has come to light a 9 000 year old hunting camp in Uxbridge a 2 mile long prehistoric bank and ditch cursus monument at Stanwell the spectacular Roman heart of the City the Saxon trading emporium on the Strand the largest medieval cemetery excavated in Europe at Spitalfields and Shakespeare's Rose Theatre at Bankside This book completed with the substantial support of English Heritage and the City of London Archaeological Trust represents the latest and most comprehensive attempt to place these treasures in their context It also draws together the knowledge of specialists and experts to provide a framework within which future archaeological discoveries and research may be considered The result is an accessible and fascinating insight into the rich diversity of human experience that has combined over the last half million years into the metropolis of Greater London today The Archaeology of Greater London is presented in 10 period based chapters with 13 accompanying full colour maps and an extensive bibliography and gazetteer of sites and finds

The Archaeology Coursebook Jim Grant, Sam Gorin, Neil Fleming, 2005 This fully updated and revised new edition of the bestselling The Archaeology Coursebook is a guide to students studying archaeology for the first time providing pre university students and teachers as well as undergraduates and enthusiasts with the skills and technical concepts necessary to grasp the subject

**BOOK JACKET** **The Archaeology of Medicine in the Greco-Roman World** Patricia A. Baker, 2013-09-30 This book teaches students and scholars of Greco Roman medical history how to use and critically assess archaeological materials Ancient medicine is a subject dominated by textual sources yet there is a wealth of archaeological remains that can be used to broaden our understanding of medicine in the past In order to use the information properly this book explains how to ask questions of an archaeological nature how to access different types of archaeological materials and how to overcome problems the researcher might face It also acts as an introduction to the archaeology of medicine for archaeologists interested in this aspect of their subject Although the focus is on the Greco Roman period the methods and

theories explained within the text can be applied to other periods in history The areas covered include text as material culture images artifacts spaces of medicine and science and archaeology

**The Archaeology of London** Ralph Merrifield,1974 Describes archaeological finds in the London area and their importance in reconstructing the history of the area from the first appearance of man to the seventh century A D

**Approaches to the Archaeological Heritage** Henry Cleere,1984-08-16 This book undertakes a comparative study of the history and development of legislative and administrative systems in operation today for the protection of archaeological monuments With the exception of Scandinavia and the United Kingdom no country adopted a positive policy towards the protection and conservation of its archaeological and historical heritage until the twentieth century Moreover it was not until the middle of that century under the threat of wholesale devastation from extensive schemes for social and economic development that the accelerating disappearance of the sites and monuments of Antiquity became the object of intensive study and legislation Since then systems of cultural resource management have developed throughout the world A range of countries from Europe America Asia and Africa representing a diversity of political and ideological systems capitalist socialist and ex colonial have been selected as being broadly representative of the variety of these systems The case studies have been written by distinguished archaeologists and provide critical evaluations of the objectives and shortcomings of these systems

**The Archaeology of Ritual and Magic** Ralph Merrifield,1987 Like all human activities ritual customs intended to gain advantage or avert disaster by supernatural means have left their mark on the archaeological record Yet archaeologists are often reluctant to recognize evidence of behavior that has no obvious material purpose Even where they realize that something unusual has occurred they will put forward every other possible explanation in terms of accident or functional utility however improbable For the first time Ralph Merrifield systematically looks at the evidence for European ritual from prehistoric times to the present day In examining different kinds of ritual superstition and magic whether animal sacrifice offerings to earth and water spells and charms or antidotes to witchcraft he shows how common patterns of activity have continued with little alteration over the centuries Through fundamental changes of religious belief from primitive animism to developed paganism from paganism to Christianity from traditional Catholicism to Protestantism and even from religious faith to scientific rationalism the same kinds of simple ritual have survived to give comfort and a sense of security Profusely illustrated this provocative and readable study will not only be required reading for archaeologists at all levels but will also appeal to all those interested in folklore and the oddities of human behavior

**Roman London** Dominic Perring,1991 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company

**Understanding the Archaeological Record** Gavin Lucas,2012-02-06 This book explores the diverse understandings of the archaeological record in both historical and contemporary perspective while also serving as a guide to reassessing current views Gavin Lucas argues that archaeological theory has become both too fragmented and disconnected from the particular nature of archaeological evidence The book examines three ways of

understanding the archaeological record as historical sources through formation theory and as material culture then reveals ways to connect these three domains through a reconsideration of archaeological entities and archaeological practice Ultimately Lucas calls for a rethinking of the nature of the archaeological record and the kind of history and narratives written from it

**London in the Roman World** Dominic Perring, 2022-01-27 incAn original authoritative survey of the archaeology and history of Roman London London in the Roman World draws on the results of latest archaeological discoveries to describe London's Roman origins It presents a wealth of new information from one of the world's richest and most intensively studied archaeological sites and a host of original ideas concerning its economic and political history This original study follows a narrative approach setting archaeological data firmly within its historical context London was perhaps converted from a fort built at the time of the Roman conquest where the emperor Claudius arrived to celebrate his victory in AD 43 to become the commanding city from which Rome supported its military occupation of Britain London grew to support Rome's campaigning forces and the book makes a close study of the political and economic consequences of London's role as a supply base Rapid growth generated a new urban landscape and this study provides a comprehensive guide to the industry and architecture of the city The story traced from new archaeological research shows how the city was twice destroyed in war and suffered more lastingly from plagues of the second and third centuries These events had a critical bearing on the reforms of late antiquity from which London emerged as a defended administrative enclave only to be deserted when Rome failed to maintain political control This ground breaking study brings new information and arguments to our study of the way in which Rome ruled and how the empire failed

**London, 1100-1600** John Schofield, 2011 Since the early 1970s the increasingly effective conduct of archaeological work in the City of London and surrounding parts of the conurbation have revolutionised our view of the development and European importance of London between 1100 and 1600 There have been hundreds of archaeological excavations of every type of site from the cathedral to chapels palaces to outhouses bridges wharves streams fields kilns roads and lanes The study of the material culture of Londoners over these five centuries has begun in earnest based on thousands of accurately dated artefacts especially found along the waterfront Work by documentary historians has complemented and filled out the new picture This book written by an archaeologist who has been at the centre of this study since 1974 will summarise the main findings and new suggestions about the development of the City its ups and downs through the Black Death and the Dissolution of the Monasteries its place in Europe as a capital city with great architecture and relations with many other parts of Europe from the Baltic to the Mediterranean London has been the most intensively studied medieval city in Europe by archaeologists due to the pace of development especially since the 1970s Thus although this will be a study of a single medieval city it will be a major contribution to the Archaeology of Europe 1100 1600 The book is endorsed by the Museum of London the City of London Archaeological Trust and the City of London Corporation whose logos will appear on the back cover

**London, 1100-1600** John Schofield, 2011 Winner of the
