Includes subject area sections that describe all pertinent census data products available i e Business trade and services
Geography Transportation etc **Economic Development and Inequality in China** Hong Yu,2017-09-29 The
conventional belief that all regions have equally benefited from China s remarkable development over the last three decades
is subjected to criticism in this book as Hong Yu systematically analyses the issue of regional inequality during the post 1978
period using the case of Guangdong Guangdong is one of the key industrial centres and economic powerhouses in China and
as a pioneer province instigating economic reform as China opened up to the world it offers an ideal focus upon which to
question and enrich the Western theories of economic geography and regional disparity Based on field research analysis of
geographic characteristics and regression models this book illustrates how Guangdong s impressive development record has
been marred by its rising regional disparity investigates the main causes of this disparity and draws conclusions regarding
the lessons China can learn from it Economic Development and Inequality in China will be of interest to students and
scholars of Chinese economics Chinese regional studies economic geography and China Studies Hong Yu is a Visiting
Research Fellow at the National University of Singapore His research interests lie in the field of regional economy He is the
author of a chapter on China s two delta regions in the book China and The Global Economic Crisis **Annual Report of
the Trustees of the Perkins Institution and Massachusetts School for the Blind for the Year Ending ...** Perkins
Institution and Massachusetts School for the Blind,1878 **Study on China's Industrial Competitiveness** Yanyun
Zhao,2023-03-06 This book builds an information platform on China s industrial competitiveness providing scientific design
and application case studies for integrated analysis and decision making facilities and mechanisms for enterprises industries
financial institutions and governments which can make up for the lack of adequate information in China s market operations
especially the problems of duplicate construction and vicious competition aggravated by the lack of systematically processed
industrial information This book not only pursues innovation in technical methods and application theories but also pursues
the collection processing and collation of relevant domestic and international data and development and application so as to
provide primary results for an industrial competitiveness database adapted to government management needs The research
is closely related to the actual problems in China and extensively uses statistical data to make various model analyses which
has a relatively sizeable academic value **The Lancet** ,1892 **Walford's Antiquarian Magazine and Bibliographical
