### Scientific Inquiry Cycle: Review

Science helps researchers solve problems by applying knowledge and creating testing other "based with a test" which can be used to find or create improvements using evidence or ideas or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Documenting the part of a solution might face challenges, especially, as it is important to weigh trade-offs carefully. For example, creating materials for a house that may affect its cost and ease of use, which influence the effectiveness of the solution.

After developing a solution, documenting how it works, what constraints affected it, and any compromises made help others learn and possibly improve on the idea. Communication, sharing knowledge openly, and reflecting on the impacts of the innovation are essential steps. This process involves how sharing science locally encourages responsible decision-making and leads communities thrive.

#### 6. Mark the best answer for each question.

1. What is the first important step when applying science to solve a local problem?
- Designing a solution immediately
