**The Transformation of the Gulf** David Held, Kristian Ulrichsen, 2013-03-01 This book examines the political economic and social transformation of the six member states of the Gulf Cooperation Council (GCC) and the ways in which these states are both shaping and being reshaped by the processes of globalisation. Adopting a multidisciplinary approach the volume combines thematic chapters focusing on issues such as globalisation, nationalism and identity, political thinking and economic diversification and redistributive policymaking with empirical chapters studying specific aspects of reform and change. The emergence of governing markets, the rise of Sovereign Wealth Funds, Islamic Finance, the relationship between energy and sustainability, trends in foreign aid, donorship, strategic and foreign policy formulation. Contributions from experts in the field provide cutting edge snapshots of a region in flux and collectively offer a roadmap of its repositioning in the global order, examining the interaction between global processes and internal dynamics of change and resistance that inject new dimensions into debates over the loci of local and global transformations and the manner in which each plays off the other. Situating the Gulf States firmly within their global twenty first century context this book will hold particular appeal to theorists of globalisation as well as to scholars of comparative politics, international political economy and area studies.

*Assessing and Correcting Reading and Writing Difficulties* Thomas G. Gunning, 2002 This text provides numerous examples and thorough coverage of procedures for assessing and instructing struggling readers of all ages. In keeping with current theory the text emphasizes prevention and early intervention. It is based on the premise that student performance is variable and that assessment and instruction are planned and modified to meet the varied needs and levels of students. Gunning does not subscribe to a medical model that emphasizes deficiencies but rather focuses on what students can do. This text calls for inclusion not exclusion but recognizes that struggling learners need expert, carefully planned assessment and instruction. Assessment coverage includes a grounding in basic concepts of tests and measurement. While formal standardized measures are described, emphasis is placed upon informal but highly regarded techniques such as the informal reading inventory, miscue analysis, running records, observation, think alouds, holistic scoring of writing and portfolio assessment. In addition to chapters devoted specifically to assessment, ways to connect assessment and instruction are mentioned throughout the text. Coverage of instructional techniques is thorough and practical. Nine chapters are devoted to instructional techniques.
