*Smart Dating Advice for Women* Dylan Brix,2019-05-31 This book is a millennial s science based system for deciding if your relationship is doomed separating truth from myths about love and increasing your probability of finding the right long term partner Are you confused about relationships When you are in a relationship or looking for a new one it can be a mess trying to figure out what matters and what doesn t Unfortunately our culture and our education system have failed us We grow into adults without ANY sense of how to make the most important decision of our lives whom to marry I developed this system when I was struggling with a decision about whether or not to stay in a relationship I was floundering in a sea of conflicting feelings of guilt longing fear ambition and dread To save myself I picked up about 7 different books about relationships Ultimately I cobbled together the best ideas from three of them and put together a framework that saved my life Over time I began to share this framework with friends and coworkers It started as an email to one person Slowly but steadily I found it to be the 1 thing that my friends wanted to talk about with me As it turns out I realized that we all are searching for a long term partnership that bring out the best in us But our relationship advice usually is a mix of unrealistic scenes from movies and contradictory old sayings from family When I was struggling with my relationships I craved a method that I could articulate I craved a method that would break down relationships into their component parts And I craved a method that was based on science in this case psychology As I read I took notes To my surprise years later those notes have turned into this guide which outlines a step by step system for assessing yourself and your partner to help you judge if you

are likely to be a good long term match If you are the type of person who does their homework this approach will resonate And if you are looking for a better way to make smart relationship decisions I hope that my approach brings you value It has worked for me     Haydn's Dictionary of Dates and Universal Information Relating to All Ages and Nations Joseph Haydn,1893     **Smart Dating** Bernard R.
