The investing strategy that famously generates higher returns with substantially reduced risk presented by the investor who invented it. A treasure of well researched momentum driven investing processes. Gregory L Morris Chief Technical Analyst and Chairman Investment Committee of Stadion Money Management LLC and author of *Investing with the Trend*. Dual Momentum Investing details the author's own momentum investing method that combines U.S. stock, world stock and aggregate bond indices a formula proven to dramatically increase profits while lowering risk. Antonacci reveals how momentum investors could have achieved long run returns nearly twice as high as the stock market over the past 40 years while avoiding or minimizing bear market losses and he provides the information and insight investors need to achieve such success going forward. His methodology is designed to pick up on major changes in relative strength and market trend. Gary Antonacci has over 30 years experience as an investment professional focusing on under exploited investment opportunities. In 1990 he founded Portfolio Management Consultants which advises private and institutional investors on asset allocation, portfolio optimization and advanced momentum strategies. He writes and runs the popular blog and website optimalmomentum.com. Antonacci earned his MBA at Harvard. **Smart Engineering Systems** Cihan H. Dagli, 1997
Proceedings of the Artificial Neural Networks in Engineering Conference November 9-12 1997 St. Louis Missouri. The papers compiled in this book focus on building smart components to engineering systems currently available. The term smart in this context indicates physical systems that can interact with their environment and adapt to changes in both space and time by their ability to manipulate the environment through self awareness and perceived models of the world based on both quantitative and qualitative information. Recent technologies such as artificial neural networks, fuzzy logic, evolutionary programming, data mining, wavelets, complex systems and virtual reality form the basis of Smart Engineering System Design. In 1997 the Department of Engineering Management at the University of Missouri-Rolla organized the ANNIE 97 conference to advance the techniques of Smart Engineering System Design in collaboration with the IEEE Neural Network Council. This was the seventh meeting held in St. Louis Missouri U.S.A. since the founding of the conference in 1991. The conference attracted over 162 papers from 20 countries which after being peer reviewed and revised have been included in this book.
