Smart Regulation:

Verso la smart regulation in Europa Federico Basilica, Fiorenza Barazzoni, 2013

The EU Better Regulation Agenda Sacha Garben, Inge Govaere, 2018-05-17 Better Regulation in the EU is a perennial and topical question which has important implications for the future direction of EU law. While actions directed at improving the quality and accessibility of EU regulation are not novel in recent years, the Better Regulation Agenda has significantly affected the structural organisation and day to day operation of the EU legislative process. Yet many questions about the future of the Agenda remain, not least in light of Brexit. Exploring the Better Regulation Agenda and its relation to the overall EU legal and political order necessitates an integrated interdisciplinary approach. This edited volume presents insights from economics, political science and legal scholarship. Furthermore, to allow full understanding, it examines institutional practice where the Agenda is made and shaped on a daily basis. Hence the book features contributions from the perspective of the work of the main EU institutions: the European Commission, the Parliament, the Council and the Court of Justice. This results in a seminal overview of the subject of interest to scholars and practitioners alike.

Better Regulation Stephen Weatherill, 2007-06-28 The discourse of Better Regulation is a hot topic intimately associated with the drive for cost savings and a more efficient economy. In the UK and in the EU, rule makers have lately endeavoured to achieve a more satisfactory balance between the demands of proper protection from market failure and inequity on the one hand, and commercial freedom and the potential for innovation on the other. But who is the regulator listening to, and what effect does this have on the regulatory pattern governing the integrating EU market? What is best practice in the matter of regulatory assessment? The essays in this collection explore these and other questions and will foster greater understanding of UK and EU regulation, the accountability issues involved and problems of enforcement. It is no coincidence that since efforts to construct a Constitution for Europe have stalled, the attention of policy makers, politicians and the business community has turned instead to the quest for Better Regulation, or perhaps it might be said, a Better European Union.

Legislation in Europe Ulrich Karpen, Helen Xanthaki, 2017-02-23 This book provides a practical handbook for legislation. Written by a team of experts, practitioners and scholars, it invites national institutions to apply its teachings in the context of their own drafting manuals and laws. Analysis focuses on general principles and best practice within the context of the different systems of government in Europe. Questions explored include subsidiarity, legitimacy, efficacy, effectiveness, efficiency, proportionality, monitoring and regulatory impact assessment. Taking a practical approach which starts from evidence-based rationality, it represents essential reading for all practitioners in the field of legislative drafting.

Smart Regulation Neil Gunningham, Peter Grabosky, Peter N. Grabosky, Darren Sinclair, 1998 Despite decades of policy experimentation, the ultimate goal of efficient and effective environmental regulation has continued to elude policy makers and regulatory theorists. The less than satisfactory performance of both government and market approaches to environmental protection has led to the introduction of a broader

range of policy mechanisms such as education information based strategies economic instruments and self regulation Yet these various policy instruments are usually treated as alternatives to one another rather than as complementary Drawing from studies in North America Europe and Australia the authors show how the design of complementary combinations of policy instruments tailored to particular environmental goals and circumstances will produce more effective and efficient policy outcomes They also confront the critical problem of how at a time of fiscal constraint and small government environmental policy might still be designed in ways that improve outcomes both for the environment and for business
