Smart Tests:

Smart Tests Catherine M. Walker, Edgar Schmidt, Kat Mototsune, 2004 High stakes accountability and the growing move towards standardized testing are placing teacher knowledge and assessment skills under ever increasing scrutiny. Teachers know what is going on in their classrooms and have first hand reliable evidence of what their students can accomplish. They can be the major factor in student assessment and help their students better demonstrate what they have learned. Smart Tests shows educators how to create well structured evaluation tools that match assessment tasks to the purpose and content of instruction. Teachers learn how to relate testing directly to classroom goals and activities and make assessment an integral part of learning and teaching not just the end result. They will find the information they need to build assessment tasks that give students in grades K-8 the opportunity to succeed. These tasks encourage students to apply new knowledge, reflect and defend their thoughts and opinions and connect what they learn the world beyond the classroom.

Foster, 2005 Shows how to move from the Mystery model to the Mastery model. Written for parents and educators especially those who

live and work with gifted high ability children the authors describe ways to develop children's natural abilities. Introducing the Mystery and Mastery models of gifted education the authors invite controversy by challenging several commonly held assumptions. They then present practical strategies to help parents and educators identify and nurture the abilities of children with high ability. This book answers the charges that special programs for gifted children are elitist. The authors demonstrate that it is simply appropriate to provide educational experiences that each child needs at a particular time.

Official Proceedings Western Railway Club, 1898 **Student Advantage Guide to the Best 310 Colleges 1997** Tom Meltzer, John Katzman, Edward T. Custard, 1996-07-30 When it first appeared USA Today called this book the guide that doesn't follow a textbook approach to college life. The Best 310 Colleges is based on The Princeton Review's student surveys the largest campus surveys in the nation. More than 59 000 students answer questions on everything from academics to campus life. Topics include the quality of teaching, dorms and dining hall fare, campus politics left or right and conservative or liberal, whether the student body is diverse or homogeneous, tolerant or intolerant of race, class, relations and of gay students, and high or low in its use of beer, liquor and marijuana. In fact this book has caused schools across the country to change their food, campuses and drinking policies. Also included is information concerning admission and financial aid policies, student body demographics, average recentered SAT scores and What's Hot/What's Not, as well as the Counselor O Matic an easy to use if highly unscientific guide to your chances of getting into each of the top 310 colleges by calculating your desirability rating and comparing it to each school's selectivity rating. Here's a sampling of what students have to say: This school is filled with wealthy, well dressed egomaniacs who are about as socially conscious as Marie Antoinette. I'm premed and there's no place I would rather be. The academics are a killer, no joke, but for those few who survive the world is their oyster. If you're not Caucasian the adjustment here is tremendous. Since this is a Jesuit institution not all viewpoints get expressed, particularly liberal ones about gays and premarital sex. You have to be smart about where you go at night. The food here is really bad, it's either bland or sickening. You're lucky if they don't screw up the bread. Socially the surrounding area is so dead that the Denny's closes at night. Girls over 5'8" watch out for some reason guys here have munchkin blood in them or something.
