## **Smartform Series Handbook:**

The SmartForm Series Handbook Dan Shafer, Don Huntington, 1989 This book is much more than a basic user's guide. Along with the process of forms design and specific techniques to use it discusses using the built-in programming functions to add intelligence to form designs, tutorials for constructing typical business forms that don't require programming, and a gallery of forms and form segments. Pro SAP Scripts, Smartforms, and Data Migration Sushil Markandeya, 2017-12-01 Master SAP scripts, Smartforms, and data migration with hands-on exercises. The information provided in this book will help you decode the complexities and intricacies of SAP ABAP programming. Pro SAP Scripts, Smartforms, and Data Migration begins by describing the components of a SAP script, forms, styles, and standard texts. It then shows you how an ABAP program can invoke a SAP script form and send data to the form to provide output. You will then apply these concepts to hands-on exercises covering real business scenarios. These scenarios include creating a custom form from scratch to output purchase orders. Smartforms will then be introduced as an enhanced tool to output business documents. The book will show you how to apply the concepts of Smartforms to real-world problems. The data migration material includes details of the Legacy System Migration Workbench (LSMW). This is introduced as a platform from which every data migration task can be performed, minimizing or eliminating programming. What You Will Learn: Create and deploy SAP script forms and related objects; Modify a copy of a SAP-supplied SAP script form, configure it, and deploy it according to transaction code ME22N; Build Smartforms forms and deploy them; Carry out data migration using the batch input and call transaction methods; Perform data migration using all four methods available in LSMW; Modify a copy of a SAP-supplied Smartforms form, configure it, and deploy it according to transaction code NACE. Who This Book Is For: Readers new to SAP ABAP programming, close to three years of experience or less, are the primary target audience for this book. Intermediate users can also utilize this book as a reference source. **The Cumulative Book Index**, 1990 A world list of books in the English language.
