Bloch, 2012-12-06 The field of nucleic acids has grown to such a tremendous size that it is impossible to include all publications concerning the chemistry and biological role of nucleic acids in an article of the length presented in this Volume Therefore it is necessary to select the most important contributions and those not included in well known reviews In many cases reference is made only to the authors who summarized their specialized field in chapters of the three volumes of *The Nucleic Acids* ed B E CHARGAFF and J N DAVIDSON Acad Press New York 1955 and 1960 or to the *Nucleic Acid Outlines* V R POTTER Burgess Publishing Comp Minneapolis where further literature and more detailed discussions may be found Facts and theories will be dealt with but not lists of references Therefore it is not possible to follow in all cases the historical development of an idea and to acknowledge all publications which might be important and interesting from another point of view Very little is mentioned about methods in the field of nucleic acids
