Steelworker Alley:

Steelworker Alley Robert Bruno, 1999 For retired steelworkers in Youngstown Ohio the label working class fits comfortably Questioning the widely held view that laborers in postwar America have adopted middle class values Robert Bruno shows that in this community a blue collar identity has provided a positive focus for many residents The son of a Youngstown steelworker Bruno returned to his hometown seeking to understand the formation of his own working class consciousness and the place of labor in the larger capitalist society Drawing on interviews with dozens of former steelworkers and on research in local archives Bruno explores the culture of the community including such subjects as relations among co workers class antagonism and attitudes toward authority He describes how because workers are often neighbors the workplace takes on a feeling of neighborhood He also demonstrates that to understand class consciousness one must look beyond the workplace in this instance from Youngstown s front porches to its bowling alleys and voting booths Written with a deeply personal approach **Steelworker Alley** is a richly detailed look at workers which reveals the continuing strength of class relationships in America

Steeltown U.S.A Sherry Lee Linkon, John Russo, 2002 Once the symbol of a robust steel industry and blue collar economy Youngstown Ohio and its famous Jeannette Blast Furnace have become key icons in the tragic tale of American deindustrialization Sherry Lee Linkon and John Russo examine the inevitable tension between those discordant visions which continue to exert great power over Steeltown s citizens as they struggle to redefine their lives When the Jenny was shut down in 1978 50 000 Youngstown workers lost their jobs cutting the heart out of the local economy Even as the community organized a nationally recognized effort to save the mills the city was rocked by economic devastation runaway crime and mob scandal problems that persist twenty five years later In the midst of these struggles the Jenny remained standing as a proud symbol of the community s glory days still a dominant force in the construction of both individual and collective identities in Youngstown Focusing on stories and images that both reflect and perpetuate how Youngstown understands itself as a community Sherry Lee Linkon and John Russo have forged a historical and cultural study of the relationship between community memory work and confl

The Heat Jimmy Santiago Baca, Stacy James, 2001 A collection of short stories written by steelworkers under the guidance of award winning poet Jimmy Santiago Baca These voices of the working class describe what it s like to spend a lifetime in the shadow of America s steel mills The Heat offers a rare last glimpse inside the huge old abandoned plants that now litter the rust belt landscape *Beyond the Ruins* Jefferson Cowie, Joseph Heathcott, 2003 The immediate impact of deindustrialization the suffering inflicted upon workers their families and their communities has been widely reported by scholars and journalists In this important volume the authors seek to move discussion of America s industrial decline beyond

the immediate ramifications of plant shutdowns by placing it into a broader social political and economic context Emphasizing a historical approach the authors explore the multiple meanings of one of the major transformations of the twentieth century The concept of deindustrialization entered the popular and scholarly lexicon in 1982 with the publication of *The Deindustrialization of America* by Barry Bluestone and Bennett Harrison *Beyond the Ruins* both builds upon and departs from the insights presented in that benchmark study In this volume the authors rethink the chronology memory geography culture and politics of industrial change in America Taken together these original essays argue that deindustrialization is not a story of a single emblematic place such as Flint or Youngstown or a specific time period such as the 1980s Nor is it limited to the abandoned factory buildings associated with heavy industry Rather deindustrialization is a complex process that is uneven in its causes timing and consequences The essays in this volume examine this process through a wide range of topics from worker narratives and media imagery to suburban politics environmental activism and commemoration
