Stellar Interiors:

Stellar Interiors Carl J. Hansen, Steven D Kawaler, 2012-12-06 That trees should have been cut down to provide paper for this book was an ecological affront From a book review Anthony Blond in the Spectator 1983 The first modern text on our subject Structure and Evolution of the Stars was published over thirty years ago In it Martin Schwarzschild described numerical experiments that successfully reproduced most of the observed properties of the majority of stars seen in the sky He also set the standard for a lucid description of the physics of stellar interiors Ten years later in 1968 John P Cox's two volume monograph Principles of Stellar Structure appeared as did the more specialized text Principles of Stellar Evolution and Nucleosynthesis by Donald D Clayton and what a difference ten years had made The field had matured into the basic form that it remains today The past twenty plus years have seen this branch of astrophysics flourish and develop into a fundamental pillar of modern astrophysics that addresses an enormous variety of phenomena In view of this it might seem foolish to offer another text of finite length and expect it to cover any more than a fraction of what should be discussed to make it a thorough and self contained reference Well it doesn't Our specific aim is to introduce only the fundamentals of stellar astrophysics You will find little reference here to black holes millisecond pulsars and other sexy objects

Union Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation in all fields of astronomy and astrophysics. It is due to the ever lasting increase of the bulk of material that the information content of our regular volumes is growing seriously. Therefore the need for detailed index informations allowing the performance of retrospective literature searches becomes more and more important. Volume 23/24 the second General Index of Astronomy and Astrophysics Abstracts contains author and subject indexes to volumes II/14 and respectively 17/22. Thus the astronomical and astrophysical literature of the whole five year period 1974-1978 is covered by this volume. It is a pleasure to express our gratitude to Ms Helga Ballmann, Ms Monika Betz, Mr Gernot Burkhardt, Ms Lore Kiefert, Ms Dagmar Roeder, Ms Dimitra Roussou and Mr Werner Sanns for their kind support during the detailed preparation steps of the indexes.

Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world. It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970.

Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume II contains literature published in 1974 and received before August 15, 1974; some older literature which was received late and which is not recorded in earlier volumes is also included. Beginning with this volume some minor changes of our classification scheme have been made. We acknowledge with thanks contributions to this volume by Dr J BouSka who surveyed journals and publications in the Czech language and supplied us with abstracts in English and by the Commonwealth Scientific and Industrial Research Organization C S I R O Sydney for providing titles and abstracts of papers on radio astronomy.
