

Feedback and Next Steps Guidance

What is formative feedback?

Formative feedback is about success *as well as* failure.

- give evidence of where the learner is now (the strengths and areas for development) in relation to the performance criteria
- support the learner on their learning journey
- give direction on how to build on their progress towards the goal

Formative feedback should be given to help students to make progress in their learning.

Formative feedback should be given at the appropriate time to support students to move forward in their learning.

Formative feedback should not compare learners to others or to a standard. It should be focused on the individual learner.

How might formative feedback be delivered?

Formative feedback might be written.

Written feedback

- is generally given after the completion of the task
- takes the form of comments or grades

Written feedback is important to provide time for learners to read, process and respond to the feedback.

Written feedback should always be marked, unless when it is informal and brief.

Offer this written feedback in a way that is consistent with the established feedback culture.

Written feedback should take the form of a short, written record, summarising the learners' work, for the purpose of future reference.
