No Money Down! Ronald P. Maierhofer,2009-09

Have you ever dreamed or had a fantasy about owning a sports franchise This is a compelling story about the author s journey through his American dream His story covers the years 1979 to 1983 during which he successfully acquired a professional indoor soccer team franchise in the Major Indoor Soccer League MISL with no money down and how he subsequently lost it The author has a practical leveraging method which when used can be applied to buying or acquiring any business He clearly and simply lays out those guidelines This is a story of a working man s desire and how he figured out how to initially get a franchise funded with other people s money OPM And after funding to market it successfully against other established and popular sport leagues then only to see how quickly it vanished Guidelines to the steps to acquiring a sports franchise are laid out The birth of the author s dream begins in 1979 while vacationing on the beautiful island of Virgin Gorda In Chapter 1 we are exposed to his vision which at this time is nothing more than a pipe dream Guidelines to acquiring a franchise are laid out in Chapter 2 The game plan is developed and strategies unfurled Once awarded the franchise he must raise the funds to sustain the franchise and operational costs In Chapter 3 he develops step by step instructions on how to legally structure the deal to entice investors and to learn about funding Chapters 4 5 and 6 give us detailed insights about the inner workings of a sports franchise How to organize How to staff How to market the dream And how to acquire players These chapters are a must for all sports marketers sports educators and entrepreneurs Chapter 7 sweeps us into the cacophony of a major indoor sporting event The

media coverage is outlined in Chapter 8 We commiserate with the author as he describes the demise of his dream in Chapter 9 and how he rises from the ashes in the final chapter From Chapter 7 Imagine if you can sitting in a luxurious and darkened indoor arena at game time waiting for your team to be introduced for the first time The playing field is a plush emerald green fast track surface Suddenly flashing strobe lights appear swirling their multicolored beams around the arena Then deafening music starts playing You feel your adrenalin rising and you are getting into the magic Unexpectedly a spotlight appears at one end of the arena The light is focused on one of the goals and it and the surrounding area is engulfed in artificial fog It's game time *Development of executive function during childhood* Yusuke Moriguchi,Philip D Zelazo,Nicolas Chevalier,2016-04-01

Executive function refers to the goal oriented regulation of one's own thoughts actions and emotions Its importance is attested by its contribution to the development of other cognitive skills e.g. theory of mind social abilities e.g. peer interactions and academic achievement e.g. mathematics and by the consequences of deficits in executive function which are observed in wide range of developmental disorders such as attention deficit hyperactivity disorder and autism Over the last decade there have been growing interest in the development of executive function and an expanding body of research has shown that executive function develops rapidly during the preschool years with adult level performance being achieved during adolescence or later This recent work together with experimental research showing the effects of interventions targeting executive function has yielded important insights into the neurocognitive processes underlying executive function Given the complexity of the construct of executive function however and the multiplicity of underlying processes there are often inconsistencies in the way that executive function is defined and studied This inconsistency has hampered communication among researchers from various fields This Research Topic is intended to bridge this gap and provide an opportunity for researchers from different perspectives to discuss recent advances in understanding childhood executive function Researchers using various methods including behavioral experiments neuroimaging eye tracking computer simulation observational methods and questionnaires are encouraged to contribute original empirical research In addition to original empirical articles theoretical reviews and opinions perspective articles on promising future directions are welcome We hope that researchers from different areas such as developmental psychology educational psychology experimental psychology neuropsychology neuroscience psychiatry computational science etc will be represented in the Research Topic
