solidarity and analyses the political strategic and security concerns that restrain commercial connectivity. It also looks at the Bay of Bengal region as a zone of competition and possible collaboration between the littoral countries and major powers involved in the region. Comprehensive and topical, this volume will be an essential read for scholars and researchers of international relations, South Asian studies, foreign policy, diplomacy, Southeast Asian studies, defence and strategic affairs, maritime studies, international trade, regional cooperation and political studies.

**BCIM Economic Cooperation** Gurudas Das, C. Joshua Thomas, 2018-09-03. This book examines the strategic and economic logic behind the Bangladesh-China-India-Myanmar (BCIM) Regional Cooperation. According to estimates, BCIM covers approximately 9 percent of the world's mass and 40 percent of the world's population, spanning across four countries constituting the confluence of East, Southeast and South Asia. It contributes about 13 percent to world trade but ironically only 5 percent to inter-regional trade. This volume compares the various approaches to cooperation: trade-led vs. project-led, geo-political vs. geo-strategic, Sino-centric vs. India-led. The chapters explore the complex interplay of geo-economics and geo-politics associated with BCIM sub-regional cooperation in general and the BCIM Economic Corridor (BCIM-EC) in particular. It points to the current challenges that impede globalisation and economic growth and critically reviews implications for the stakeholders, institutional frameworks and the spatial impact of the Corridor, especially on the underdeveloped regions. The book discusses the geo-political, geo-economic and geo-strategic advantages that will accrue to the member countries once the sub-regional cooperation becomes fully functional. It advocates the adoption of best practices from similar sub-regional groupings across the globe. This book will be of great interest to scholars and researchers of politics and international relations, geo-politics, strategic studies, sub-regional cooperation, South Asian studies, India-China relations, foreign trade and economics, besides those dealing with foreign policy and development cooperation. It will especially benefit policymakers, development agencies and strategic think tanks.

**Look East to Act East Policy** Gurudas Das, C. Joshua Thomas, 2016-02-12. This volume captures the success of India's Look East Policy (LEP) in promoting economic engagement with neighbouring countries in Asia and simultaneously its limitations in propelling growth in the bordering North Eastern Region. India's bridgehead to South East Asia. It analyses the instrumental role of LEP in bringing a tectonic shift in India's foreign trade by redirecting the focus from the West to the East, thus leading to a fundamental change in the nature of India's economic interdependence. Besides discussing foreign trade, it expounds as to how LEP made India play an important role in the emerging Asian security architecture and liberated Indian foreign policy from being centred on South Asia. The essays also enumerate the reasons for LEP's failure in the North Eastern Region and chart out actionable programmes for course correction that might be factored into its latest edition, the Act East Policy. This book will interest scholars and researchers of international relations, international trade and economics, politics and particularly those concerned with Northeast India.
