Stimulated Effects In Josephson Devices:

Stimulated Effects in Josephson Devices Maurizio Russo, Giovanni Costabile, 1990 Superconducting Devices and Their Applications Hans Koch, Heinz Lübbig, 2012-12-06 Since the discovery of high temperature superconductivity considerable progress has been made in research and development of superconductive electronic devices This fact is reflected by the large variety of contributions to the 4th International Conference on Superconducting and Quantum Effect Devices and their Applications SQUID 91 This comprehensive proceedings volume covers Josephson junctions SQUIDs radiation detectors flux flow transistors The main applications are contained in the chapters on biomagnetic instrumentation metrology and rf applications The purpose of this volume is to provide an up to date reference book on the status of this rapidly changing and promising field of electronic device research on the basis of low and high temperature materials **Superconductivity A.** Bissarsh, 1999 This book consists of over 600 selected descriptions and abstracts of books book chapters patents and journal articles from throughout the world dealing with this high profile topic Each citation contains complete bibliographic data plus key words The entries are grouped under the headings of Theory of Superconductivity Superconducting Devices Superconducting Properties of Materials Applications of Superconductors Author Index Subject Index **Quantum Computing in Solid State Systems** Berardo Ruggiero, Per Delsing, Carmine Granata, Yuri A. Pashkin, P. Silvestrini, 2006-05-30 Quantum Computation in Solid State Systems discusses experimental implementation of quantum computing for information processing devices in particular observations of quantum behavior in several solid state systems are presented The complementary theoretical contributions provide models of minimizing decoherence in the different systems Most recent theoretical and experimental results on macroscopic quantum coherence of mesoscopic systems as well as the realization of solid state qubits and quantum gates are discussed Particular attention is given to coherence effects in Josephson devices Other solid state systems including quantum dots optical ion and spin devices are also discussed **The New Superconducting Electronics** H. Weinstock, Richard W. Ralston, 2012-12-06 This volume is based on the proceedings of the NATO sponsored Advanced Studies Institute ASI on The New Superconducting Electronics held 9-20 August 1992 in Waterville Valley New Hampshire USA The contents herein are intended to provide an update to an earlier volume on the same subject based on a NATO ASI held in 1988 Four years seems a relatively short time interval and our title itself featuring The New Superconducting Electronics may appear somewhat pretentious Nevertheless we feel strongly that the ASI fostered a timely reexamination of the technical progress and application potential of this rapid paced field There are indeed many new avenues for technological innovation which were not envisioned or considered possible four years ago The greatest advances by far have occurred with regard to oxide superconductors the so called high transition temperature superconductors known in short as HTS These advances are mainly in the ability to fabricate both 1 high quality relatively large area films for microwave filters and 2 multilayer device structures principally superconducting normal superconducting

SNS Josephson junctions for superconducting quantum interference device SQUID magnetometers Additionally we have seen the invention and development of the flux flow transistor a planar three terminal device During the earlier ASI only the very first HTS films with adequate critical current density had just been fabricated and these were of limited area and had high resistance for microwave current

Stimulated Effects In Josephson Devices: Proc.Of The Workshop On Nonlinear., Capri, Sep.27-30, 1988 m Russo, **Macroscopic Quantum Coherence and Quantum Computing** Dmitri V. Averin,Berardo Ruggiero,Paolo Silvestrini,2012-12-06 This volume is an outgrowth of the Second International Workshop on Macroscopic Quantum Coherence and Computing held in Napoli Italy in June 2000 This workshop gathered a number of experts from the major Universities and Research Institutions of several countries The choice of the location which recognizes the role and the traditions of Naples in this field guaranteed the participants a stimulating atmosphere The aim of the workshop has been to report on the recent theoretical and experimental results on the macroscopic quantum coherence of macroscopic systems Particular attention was devoted to Josephson devices The correlation with other atomic and molecular systems exhibiting a macroscopic quantum behaviour was also discussed The seminars provided both historical overview and recent theoretical ground on the topic as well as information on new experimental results relative to the quantum computing area The first workshop on this topic held in Napoli in 1998 has been ennobled by important reports on observations of Macroscopic Quantum Coherence in mesoscopic systems The current workshop proposed among many stimulating results the first observations of Macroscopic Quantum Coherence between macroscopically distinct fluxoid states in rf SQUIDs 20 years after the Leggett s proposal to experimentally test the quantum behavior of macroscopic systems Reports on observations of quantum behaviour in molecular and magnetic systems small Josephson devices quantum dots have also been particularly stimulating in view of the realization of several possible q bits

Integrable Systems and Applications Mikhael Balabane,1989 In this volume nonlinear systems related to integrable systems are studied Lectures cover such topics as the application of integrable systems to the description of natural phenomena the elaboration of perturbation theories and the statistical mechanics of ensembles of objects obeying integrable equations The more physical lectures center largely around the three paradigmatic equations Korteweg de Vries Sine Gordon and Nonlinear Schrödinger especially the latter These have long been of great mathematical interest and also exhibit a universality which places them among the most frequently encountered integrable equations in the description of physical systems Tidal waves optical fibers and laser beams are among the topics discussed Lectures are also devoted to multidimensional solitons integrability of Hamiltonian systems of ODEs and dissipative systems of PDEs
