## **Taxation Poverty And Income Distribution:**

*Taxation, Poverty, and Income Distribution* John Creedy, 1994 The book includes twelve essays examining various issues relating to income taxation and its redistributive effect as well as problems in the measurement of poverty and inequality

**Dynamics of Inequality and Poverty** John Creedy, Guyonne Kalb, 2006-07-01 Consists of papers related to the theme of the dynamics of inequality and poverty that are subdivided into four separate parts. This volume examines inequality and poverty over time, the intergenerational transfer of poverty, inequality over time, and measurement issues. The chapters discuss inequality and poverty in developed countries.

**The Distributional Impact of Taxes and Transfers** Gabriela Inchausti, Nora Lustig, 2017-09-19 The World Bank has partnered with the Commitment to Equity Institute at Tulane University to implement their diagnostic tool, the Commitment to Equity CEQ Assessment, designed to assess how taxation and public expenditures affect income inequality, poverty, and different economic groups.

The approach relies on comprehensive fiscal incidence analysis which measures the contribution of each individual intervention to poverty and inequality reduction as well as the combined impact of taxes and social spending. The CEQ Assessment provides an evidence base upon which alternative reform options can be analyzed. The use of a common methodology makes the results comparable across countries. This volume presents eight country studies that examine the distributional effects of individual programs and policy measures and the net effect of each country's mix of policies and programs. These case studies were produced in the context of Bank policy dialogue and have since been used to propose alternative reform options.

**Poverty and Income Distribution** Edward N. Wolff, 2009 Poverty and Income Distribution 2E Written by a leading scholar in the field, this textbook provides a thorough introduction to the topic of income distribution and poverty with additional emphasis on the issues of inequality and discrimination. This book features an empirical focus and includes sections on basic statistics as well as optional econometric studies and more advanced mathematical handling of inequality measurement. Utilizing data from various countries around the globe including the US and Europe, this textbook is international in its scope and provides a comparative element that will aid students in their studies. Up to date and comprehensive in its coverage, this new edition supplies a self-contained course on income distribution and poverty.

*Poverty, Income Distribution, the Family, and Public Policy*, 1986 [Tax Incidence and Poverty Reduction: Assessing the Effects of Taxes on Income Distribution in Thailand](#)

Joseph Ato Forson, 2013-04-15 Research Paper undergraduate from the year 2013 in the subject Business economics, Investment and Finance grade None course Public Administration language English abstract This paper looks at the effects of taxes on income distribution in Thailand making use of the 2005 data from the Bureau of the Budget and other sources. We attempt to figure out if the Thai tax system is pro poor or rich i.e. progressive or regressive among the various tax types on the five quintile income groups. This paper is used to ascertain which income group tends to pay more of their incomes as taxes. The paper also explores the relationship between tax incidence and poverty reduction on the one hand and indicators of

access to education and health services and social outcomes on the other using simple measures of association We conclude that based on the results of the tax system the income distribution of Thai households became more equal on individual income tax implying a gradual effort to bridge the income gap between the rich and the poor in Thailand A pre tax Gini coefficient of 0.3056 saw a marginal improvement leading to a post tax Gini coefficient of 0.2862 on post tax IIT implying the situation on post tax individual income shows an attempt by Thai government to have equality in individual incomes and thereby bridging the income gaps In general the total post tax coefficient ended at 0.3085 indicating though efforts are being put in place by government to enhance the income situation of the poor the effort according to our empirical results is marginal and have even worsened the income disparity situation by increasing income inequality to another level The result confirms the distribution of income of Thai households became more unequal and an indicative of a tax regime which is regressive at the end We therefore make a number of policy recommendations on the ensuing situation

Joel Slemrod,1996-10-13 This book assembles nine papers on tax progressivity and its relationship to income inequality written by leading public finance economists The papers document the changes during the 1980s in progressivity at the federal state and local level in the US One chapter investigates the extent to which the declining progressivity contributed to the well documented increase in income inequality over the past two decades while others investigate the economic impact and cost of progressive tax systems Special attention is given to the behavioral response to taxation of high income individuals portfolio behavior and the taxation of capital gains The concluding set of essays addresses the contentious issue of what constitutes a fair tax system contrasting public attitudes towards alternative tax systems to economists notions of fairness Each essay is followed by remarks of a commentator plus a summary of the discussion among contributors **IB**

**Inequality and Optimal Redistributive Tax and Transfer Policies** Mr.Howell H. Zee,1999-04-01 This paper explores the revenue raising aspect of progressive taxation and derives on the basis of a simple model the optimal degree of tax progressivity where the tax revenue is used exclusively to finance perfectly targeted transfers to the poor The paper shows that not only would it be optimal to finance the targeted

transfers with progressive taxation but that the optimal progressivity increases unambiguously with growing income inequality. This conclusion holds up under different assumptions about the efficiency cost of taxation and society's aversion to inequality. **APAIS 1992: Australian public affairs information service**,
