Bouwkamp,2018-01-18 It has been the goal in this volume to summarize the current level of understanding in a number of areas relating to sweet potato production and utilization To accomplish this a group of authors each with broad experience in the selected areas was assembled It is hoped that this volume will be useful as a beginning point a foundation for further research efforts [Handbook of Tropical Foods](#) Harvey T. comprehensive research and development program for taro should be viewed in light of a recent National Academy of Science study that points to two important facts One is that the United States must join the hungry nations to develop an agriculture that can feed the world or face food problems at home This is because food production in the United States is faltering yields are no longer increasing and increased energy inputs are starting to show diminishing returns Another point made by the study is that over the next twenty five years the new breadbaskets will be the developing countries They are the ones with the greatest capacity to increase food production A corollary to this is that neglected crops like taro have a potential that has not yet been fulfilled
