Galen's Prophecy Jerome Kagan, 2018-10-08 Nearly two thousand years ago a physician named Galen of Pergamon suggested that much of the variation in human behavior could be explained by an individual's temperament Since that time inborn dispositions have fallen in and out of favor Based on fifteen years of research Galen's Prophecy now provides fresh insights into these complex questions offering startling new evidence to support Galen's ancient classification of melancholic and sanguine adults Integrating evidence and ideas from biology philosophy and psychology Jerome Kagan examines the implications of the idea of temperament for aggressive behavior conscience psychopathology and the degree to which each of us can be expected to control our deepest emotions

Before the Law Cary Wolfe, 2024-05-31 Animal studies and biopolitics are two of the most dynamic areas of interdisciplinary scholarship but until now they have had little to say to each other Bringing these two emergent areas of thought into direct conversation in Before the Law Cary Wolfe fosters a new discussion about the status of nonhuman animals and the shared plight of humans and animals under biopolitics Wolfe argues that the human animal distinction must be supplemented with the central distinction of biopolitics the difference between those animals that are members of a community and those that are deemed killable but

not murderable From this understanding we can begin to make sense of the fact that this distinction prevails within both the human and animal domains and address such difficult issues as why we afford some animals unprecedented levels of care and recognition while subjecting others to unparalleled forms of brutality and exploitation Engaging with many major figures in biopolitical thought from Heidegger Arendt and Foucault to Agamben Esposito and Derrida Wolfe explores how biopolitics can help us understand both the ethical and political dimensions of the current questions surrounding the rights of animals
