representations of weapons and certain kinds of tools such as axes and sickles in different prehistoric protohistoric and traditional community contexts all over the world Attention focuses on rock art but also looks at stelae and statue menhirs as well as other kinds of container or vehicle for this kind of depiction The major concern is to discuss the possible meanings of these embodied signs in different areas and periods since meanings are permeable both to time and space Papers either centre their attention in broader approaches based on a specific area region or people or focus on particular case studies
