Introspection and Consciousness Declan Smithies, Daniel Stoljar, 2012-07-11 The topic of introspection stands at the interface between questions in epistemology about the nature of self knowledge and questions in the philosophy of mind about the nature of consciousness What is the nature of introspection such that it provides us with a distinctive way of knowing about our own conscious mental states And what is the nature of consciousness such that we can know about our own conscious mental states by introspection How should we understand the relationship between consciousness and introspective self knowledge Should we explain consciousness in terms of introspective self knowledge or vice versa Until recently questions in epistemology and the philosophy of mind were pursued largely in isolation from one another This volume aims to integrate these two lines of research by bringing together fourteen new essays and one reprinted essay on the relationship between introspection self knowledge and consciousness

Roden's Corner Henry Seton Merriman, 1898 It is quite clear said Cornish that the Malgamite scheme is a fraud It is worse than that it is a murderous fraud For Von Holzen s new system of making malgamite is not new at all but an old system revived which was set aside many years ago as too deadly If it is not this identical system it is a variation of it They are producing the stuff for almost nothing at the cost of men s lives In plain English it is murder and it must be stopped at any cost You understand

Divine Science and the Science of God Victor Preller, 2005-05-17 In this book Victor Preller examines the logical status of religious language in the light of recent developments in American analytic philosophy The problem inherent in religious language is presented in terms of the referential status of the word God The author argues that the significance of any referential term is dependent upon the ability of that term to play a significant role within a unified conceptual system The problem is shown to transcend the epistemological dogmas of Positivism and Conceptual Empiricism and to be inherent in any intelligible epistemology including that of Thomas Aquinas whose theological treatises serve as a model of religious

language for the thesis of this book According to Professor Preller Divine Science Aquinas term for what we now call Natural Theology results from a reflection upon the limitations encountered by the intellect in its attempt to render intelligible the objects of human experience In the Science of God Aquinas term for that mode of knowing engendered by faith the unknown meta empirical referent of Divine Science becomes the object of the human intellect While this study develops out of the discussions inaugurated by Flew and McIntyre in *New Essays in Philosophical Theology* it rejects the excessively empirical approach of most other studies in that tradition It applies post positivistic analysis to specifically Catholic theological language but it obviously applies to the theological language involved in any form of theism
